

Paper Plate Whale

Materials Needed:

- 1 Paper Plate
- Blue Paint
- Blue Construction Paper
- 1 Googly Eye
- Black Marker
- White School Glue

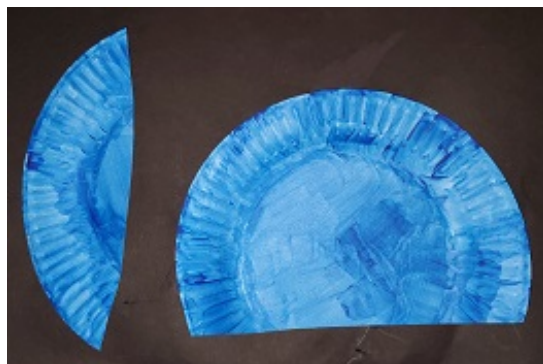

Directions:

Step 1: Paint the whole paper plate blue and leave it to dry.

Step 2: Once dry, cut a piece from the bottom of the paper plate – about one quarter of the plate.
This smaller piece will be the whale's tail.

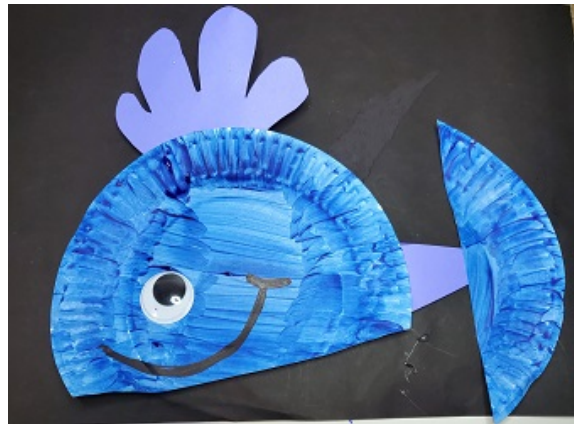

Step 3: Draw and cut out the shapes for the water that comes out of the whale's blowhole and the whale's body which are shown in the picture below. Use your blue paper for these shapes and stick them together as shown in the last picture.

Step 4: Add the googly eye.

Step 5: Add a smile or extra details using the black marker.

Step 7: Take a picture with your creation and post it to Instagram or Facebook! Don't forget to tag us @officialcityofartesia.
