

# PATRIOTIC STAR WREATH

## Supplies Needed:

- Paper plate
- Glue
- Ribbon, string or yarn
- Scissors
- Crayons (or markers or paint)
- Construction Paper or Plain Paper

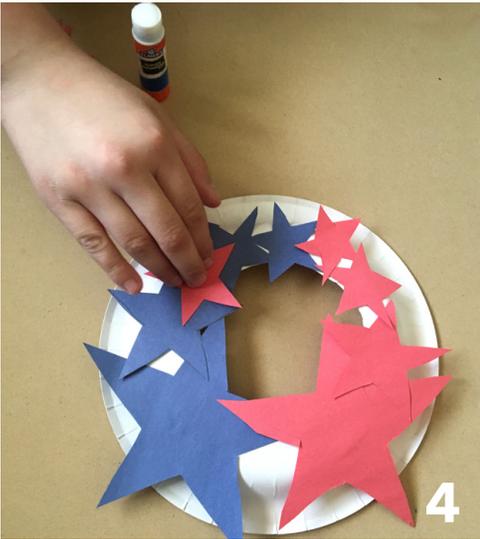

**\*\*Attention Parents: Adult supervision and assistance is required\*\***

**1. Cut out the center of a paper plate, creating the base for your wreath.**

**2) Print and cut out the star shapes on page 3. Use them to trace stars on to your paper. If using construction paper, use the stars to trace star shapes onto your paper and then cut out them out. If using plain paper, use the template to trace the star shapes onto the paper. Then you can color the stars with crayons, markers or paint them and then cut them out.**

**4. If you have glitter glue or stickers you can use them to decorate your wreath and add sparkle to your stars.**

**5. Once the wreath is decorated and the glue is dry, punch a couple of holes at the top to create a ribbon hanger. When cutting your ribbon, make sure to cut a piece that will be long enough for you to be able to tie a bow.**

**6. Once dry, take a picture with your wreath, post it to Instagram or Facebook and tag us @officialcityofartesia!**
