## SIGNATURE AND ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## 1. SUMMARY OF CONCLUSIONS

Ramboll US Consulting Inc. (Ramboll) was retained by Artesia & Flallon, LLC and Borstein Enterprises (the Client) to perform a Phase I Environmental Site Assessment (ESA) and Phase II subsurface investigation of the vacant, former dairy product processing facility and associated parking lot located at 11709 Artesia Boulevard and 17208 and 17212 Albutis Avenue in Artesia, California (herein referred to as the “facility” or the “site;” see Figures 1 and 2).

Ramboll’s assessment was conducted in connection with a potential purchase of the site. The objective of the Phase I ESA, which was conducted in conformance with the scope and limitations of ASTM International’s *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* E1527-13 (the “ASTM Standard”), and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312), was to identify Recognized Environmental Conditions (RECs), as defined in the ASTM Standard, and the scope of services identified in the August 2021 Master Environmental Consulting Services Agreement (MSA) between the Client and Ramboll, was to identify Recognized Environmental Conditions (RECs) as defined in the ASTM Standard (see Section 8).

### 1.1 Site Summary

California Dairies Inc. (formerly known as California Milk Producers) owns and maintains a vacant, former dairy product processing facility and associated parking lot in Artesia, California. The parcel located along Artesia Boulevard is approximately 3.33 acres and is currently improved as the former California Dairy manufacturing facility with five buildings totaling over 50,000 square feet. The buildings include a milk and milk product processing plant, two story office building, United States Department of Agriculture (USDA) certified testing laboratory, evaporating, drying and bagging building, a warehouse, and a parts storage building (former fleet garage).

The site was naturally vegetated land from the late 1800s through the early 1940s. By the mid-1950s, the southern and eastern portions of the site were constructed as a dairy processing facility. Residences occupied the northern and western portions of the site between the 1950s and the 1970s. The western portion of the site appears to be occupied by the present day dairy manufacturing facility since at least the mid-1970s. The north-eastern portion of the site includes an employee parking lot. The eastern portion of the site was residential between the early 1940s through the 1980s when the parking lot was constructed. The Protected Milk Producers Association owned the site in the 1970s and merged with two other dairy cooperatives in 1974 to form the California Milk Producers. The California Milk Producers (merged to become known as California Dairies Inc. in 1999) has owned the site since 1974 and conducted milk manufacturing operations.

### 1.2 Recognized Environmental Conditions

Ramboll performed a Phase I ESA of the vacant, former dairy product processing facility and associated parking lot at 11709 Artesia Boulevard and 17208 and 17212 Albutis Avenue in Artesia, California, in conformance with the scope and limitations of the ASTM Standard. Any exceptions to, or deletions from, this practice are described in Section 7.5 of this report. This assessment has revealed no RECs in connection with the site. Ramboll recommends no further investigation regarding the environmental condition of the site.

### 1.3 Other Findings

Although not considered to be RECs, Ramboll identified the following notable other findings. The term “other finding” is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

- **Past Manufacturing Operations at the Site.** Since the early 1950s, the site has been used for milk manufacturing purposes. From the 1970s through at least the 1990s, a tanker truck fleet operated at (and was repaired at) the facility. Milk manufacturing activities may have included the use of petroleum products, acids, caustics, and other chemicals. Multiple subsurface investigations have been conducted at the site, including an August 2020 sampling event conducted by GHD Inc. The results of the GHD sampling indicated that limited concentrations of pesticides (e.g., 4,4'-Dichlorodiphenyldichloroethylene [DDE] at 12 micrograms per kilogram [ $\mu\text{g}/\text{kg}$ ]) and volatile organic compounds (VOCs) are present in soil; however, none of the concentrations exceeded applicable San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels (ESLs) for the site (i.e., industrial/commercial land use). Metals detected in soil which exceeded the applicable ESLs included arsenic, lead, and vanadium (maximum levels 197 milligrams per kilogram [ $\text{mg}/\text{kg}$ ], 57.8  $\text{mg}/\text{kg}$ , and 47.7  $\text{mg}/\text{kg}$  respectively). No VOCs were detected in groundwater; metals detected in groundwater which exceeded California Maximum Contaminant Levels (MCLs) were limited to mercury (3.31 micrograms per liter [ $\mu\text{g}/\text{L}$ ]). Ammonia and nitrate (maximum concentrations of 648  $\mu\text{g}/\text{L}$  and, 94,00  $\mu\text{g}/\text{L}$ , respectively) were also detected in the groundwater, and in some locations, nitrate exceeded Environmental Protection Agency (EPA) Maximum Contaminant Levels (MCLs).

GHD indicated that lead in soils was likely associated with a former waste oil underground storage tank (UST) located in the same area. The mercury and pesticide detections were attributed to historical pesticide use in agricultural activities. Metal detections appeared to be insoluble forms and did not appear to present a risk. Ammonia appeared present at naturally occurring levels, however nitrate was observed at higher concentrations. GHD indicated that elevated nitrate levels were located in the northern portion of the site boundary and attributed the concentrations to an off-site source.

Based on the results from the previous Phase II subsurface investigation, Ramboll conducted a subsequent subsurface investigation at the site that included collection of soil and soil vapor samples throughout the site. Samples were collected in areas including former employee and truck parking areas, the former underground storage tank (UST) area, the former truck wash area, former chemical storage area, former main plant chemical storage area, former boiler area storage, and former sump pump area. Soil samples were analyzed for total petroleum hydrocarbons (TPH) and pH, while soil vapor was analyzed for VOCs by United States Environmental Protection Agency's (USEPA) Method 8260. Results from the subsurface investigation indicated that total petroleum hydrocarbons (TPH) were not detected in soil above applicable screening criteria and the pH in soil generally appears to be consistent with normal background conditions. While the sampling results from this investigation did not identify chemicals in soil at concentrations above applicable screening criteria, and the issues described above do not rise to the level of being a Recognized Environmental Condition under ASTM E1527-13, as a precautionary measure Ramboll recommends that the soil be managed in accordance with applicable state and federal regulations during potential future soil disturbance activities.

In soil vapor, benzene, tetrachloroethene (PCE) and chloroform were the only VOCs detected above applicable Department of Toxic Substances Control (DTSC)/USEPA residential and commercial screening levels using 0.03 as an attenuation factor (AF), which is used for screening purposes but which is neither an official nor controlling standard. Chloroform was the only VOC detected above applicable DTSC/USEPA residential screening levels using 0.001 as an AF (which is the official / adopted attenuation factor). No VOCs in soil vapor were detected above applicable DTSC/USEPA commercial screening levels using 0.001 as an attenuation factor.

- **Former Diesel Fuel and Gasoline USTs.** Two 10,000-gallon diesel fuel, one 10,000-gallon gasoline, and one 500-gallon waste oil USTs were formerly located along the northern site boundary adjacent to the former truck wash area. According to the GeoTracker website, the site is listed on the Leaking Underground Storage Tank (LUST) database. A gasoline release was reported in August 1987 which impacted groundwater. The Los Angeles Regional Water Quality Control Board (RWQCB) closed the case in February 1997. No records were available regarding the cleanup and subsequent closure of the USTs. Site representatives reported that soil excavation activities were conducted, however, a copy of the report was not available for Ramboll's review. Records regarding the UST closure were requested from the Fire Department but have not yet been received. Therefore, Ramboll is unable to evaluate the adequacy of the UST closure. However, there is no apparent current regulatory requirement to evaluate the area, nor is there scrutiny of the site by regulatory officials. Furthermore, Ramboll's subsurface investigation did not indicate the presence of contamination in the vicinity of the UST – and, therefore, actual data shows the former USTs do not represent a Recognized Environmental Condition. Ramboll recommends no further investigation regarding this issue.

A discussion of *de minimis* conditions and Non-Scope Considerations identified during this review is presented in Section 7.0 of this report.

## 2. INTRODUCTION

### 2.1 Scope of Work

Ramboll was retained by Artesia & Flallon, LLC and Borstein Enterprises to conduct a Phase I ESA of the vacant, former dairy product processing facility and associated parking lot in Artesia, California. The Phase I ESA relied upon the references noted below and included the following tasks consistent with the ASTM Standard and the scope of services identified in the Master Environmental Consulting Services Agreement (MSA) between the Artesia & Flallon, LLC and Borstein Enterprises and Ramboll:

- A visit to the site by Stephanie Eckelman and Kelly Chen of Ramboll on December 13, 2021 to observe the exterior and interior features of the site and to identify the uses and conditions specified in Sections 9.4.1 through 9.4.4.7 of the ASTM Standard. In addition, Ramboll observed the adjoining properties from the site or adjacent public thoroughfares. Photographs taken during the site visit are presented in Appendix A.
- An interview during the site visit with the following individual (year of initial hire at the site indicated in parentheses): Frank Noriega, assistant Plant Manager with California Dairies Inc. (1980). The aforementioned individual is referred to herein as "facility personnel." The facility personnel interviewed by Ramboll was identified by the Company as having good knowledge of the uses and physical characteristics of the site.
- A review of information contained in federal and state environmental databases, as obtained from the sources noted below:
  - A radius report prepared by EDR (see Appendix B), which presents the results of searches of federal and state databases for the site, as well as properties near the site. The radius searched for each database, as well as the databases themselves, was selected in accordance with the ASTM Standard.
  - The USEPA's Envirofacts database, which provides site information contained in multiple USEPA regulatory databases.
  - A review of GeoTracker, which provides information with respect to sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. GeoTracker contains records for sites that require cleanup, such as Leaking Underground Storage Tank (LUST) Sites, Department of Defense Sites, and Cleanup Program Sites. GeoTracker also contains records for various unregulated projects as well as permitted facilities including: Irrigated Lands, Oil and Gas production, operating Permitted USTs, and Land Disposal Sites.
  - A review of the California Department of Toxic Substances Control's (DTSC's) EnviroStor website (EnviroStor), which provides information cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known contamination or sites where there may be reasons to investigate further.
  - A review of the California Geologic Energy Management Division (CalGEM) website, which provides information regarding the locations of oil and gas wells.
  - A review of the California EPA Regulated Site Portal available online, which provides information regarding environmentally regulated sites and facilities in California.
  - A review of the National Pipeline Mapping System (NPMS) Public Viewer website, which provides information regarding the locations of hazardous liquid and gas pipelines on and in the vicinity of the Site.

- A review of standard historical sources (included as Appendix C) and local agency inquiries, as defined in the ASTM Standard. The following resources were reviewed:
  - Readily available historical sources (as identified in Section 4.2 of this report and included as Appendix C) to develop a history of the previous uses of the site and surrounding area.
  - Local building permit information for the site, as obtained via EDR’s Lightbox application.
  - Historical and site-specific information obtained from the following local agency: County of Los Angeles Office of the Assessor (Assessor). Ramboll also requested information from the City of Artesia Building and Safety Department (Building Department), and the County of Los Angeles Fire Department (Fire Department); however, a response had not been received at the time this report was completed.
  - The Los Angeles County Public Health Inspector no longer maintains hazardous materials business plans/inventory, hazardous waste generator license, California accidental release prevention program as well as spill, and site remediation information. The files are maintained by the Los Angeles County Fire Department-Health Hazardous Materials Division.
- A review of documents obtained during the site visit, including building site plans. Facility personnel reported that underground storage tank excavations, asbestos containing materials, and lead based paint surveys have previously been conducted for the site, however Ramboll was not provided with a copy of the reports.
- A review of physical setting sources, as defined in the ASTM Standard, including:
  - The current United States Geological Survey (USGS) 7.5-minute topographic map that shows the area on which the site is located.
  - Geologic, hydrogeologic, and/or hydrologic sources as provided in the EDR database report and collected during Ramboll subsurface investigation.
- A review of any information provided by the User of this assessment, including information consistent with Appendix X3 of the ASTM Standard. Pertinent information, if any, is discussed in the appropriate sections of this report

This assessment was conducted in accordance with ASTM Standard E1527-13. The standard ASTM scope was expanded to include a limited review of asbestos-containing materials, lead-based paint, mold, and radon based solely on: (i) the ages of the buildings for the potential presence of asbestos and lead-based paint; (ii) information and answers provided on a water intrusion questionnaire completed during the site walk with site representatives for the potential presence of mold; and (iii) information provided in the EDR report relating to the potential presence of radon.

## **2.2 Significant Assumptions**

In conducting this review, no significant assumptions were made, except for the following:

- Site-specific field measurements or other detailed hydrogeological information was not publicly available or reasonably ascertainable. In the absence of such data, Ramboll has assumed that the flow direction of shallow groundwater beneath the site and in the local vicinity generally reflects surface topography. Therefore, in evaluating potential on-site impacts from off-site sources, those off-site facilities not located adjacent to or within one-quarter mile upgradient of the site are not considered likely to represent an environmental concern to the site. This interpretation is based on the assumption that a hazardous material released to the subsurface generally does not migrate laterally within the unsaturated soil for a significant distance, although a hazardous material can

migrate in the groundwater in a generally downgradient direction. The lack of information discussed above does not represent a significant data gap.

### **2.3 Reliance and General Limitations**

This report has been prepared for the exclusive use of Artesia & Fallon, LLC and Borstein Enterprises and may not be relied upon by any other person or entity without Ramboll's prior express written permission. In the event of any conflict between the terms and conditions of this report and the terms and conditions of the Master Services Agreement between Ramboll and the Client (the "MSA"), the MSA shall control.

This report is considered current only for a period of 180 days from the site inspection. The conclusions presented in this report represent Ramboll's professional judgment based upon the information available and conditions existing as of the date of this report. In performing its assignment, Ramboll relied upon publicly available information, information provided by the client, and information provided by third parties. Accordingly, Ramboll can neither warrant nor guarantee the extent to which the information provided to Ramboll was accurate and complete. This review is not intended as legal advice, nor is it an exhaustive review of site conditions or facility compliance. Ramboll makes no representations or warranties, expressed or implied, about the condition of the site.

The scope of work for this assignment that included collecting samples of environmental media is detailed in Section 6.0. As such, this review cannot rule out the existence of latent conditions including contamination not identified and defined by the data and information available for Ramboll's review; however, this report is intended, consistent with normal standards of practice and care, to assist the client in identifying the risks of such latent conditions – and, as noted, did in fact include sampling and analyzing soil and soil vapor in connection with the Phase II subsurface investigation.

The scope of work for this assessment did not include an asbestos survey or inspection. According to federal OSHA regulations (29 CFR §1910.1001) and the Model Accreditation Plan (MAP; 40 CFR Part 763, Subpart E, Appendix C), the inspection, testing, evaluation, and/or sampling of suspect asbestos-containing materials must be conducted by an accredited inspector; these activities were not performed as part of this environmental review. Comments in this report regarding the condition of building materials at the site, including presumed or suspect ACM, represent only Ramboll's observations at the time of the site visit and are not intended to be consistent with definitions regarding ACM condition in the Asbestos Hazard Emergency Response Act (AHERA) or in other federal or state asbestos regulations or industry standards.

Other issues considered outside the scope of the ASTM Standard and this review include regulatory compliance, lead in drinking water, wetlands, PCBs in building materials, cultural and historical resources, ecological resources, endangered species, fire safety, and high voltage power lines.

### 3. SITE DESCRIPTION

#### 3.1 Site Setting

California Dairies Inc. (formerly known as California Milk Producers) owns and formerly operated a dairy product processing facility and associated parking lot located at 11709 Artesia Boulevard and 17208 and 17212 Alburdis Avenue in Artesia, Los Angeles County, California. The approximately 3.33-acre processing facility and 0.248-acre parking lot parcels that comprise the site are located approximately 20 miles southeast of the City of Los Angeles (Figure 1).

According to LA County Assessor Portal, the assessor identification number (AIN) for the processing facility located along Artesia Boulevard is 7035-016-064, and the AINs for the conjoined parking lot parcels located east of Alburdis Avenue are 7035-020-057 (northern parcel) and 7035-020-056 (southern parcel).

The main portion of the site is improved as the former California Dairies Inc. manufacturing facility. Structures include approximately five (5) buildings totaling over 50,000-square-feet. Operations conducted at the buildings include the following:

<b>Table 1: Building Operations Descriptions</b>	
Building	Former Operations Conducted
Office and Dispatch	Accounting and dispatch operator office, and raw milk silo room
Main Plant	Offices, United States Department of Agriculture (USDA) Certified Laboratory, main milk product processing plant, evaporators, facility maintenance shop, ammonia and glycol chiller storage room, and small parts storage room
Dryer and Evaporator	Four-story powdered milk dryer and bagging room, evaporator, and wastewater Dissolved Air Flotation (D.A.F.) control room and treatment areas
Dry Storage	Warehouse storage for dry goods
Parts Room	Storage for equipment parts, former fleet garage and repair area

Additional features on the site include two truck parking areas, two employee parking areas, two truck scales, a chemical storage area, truck washing area, as well as multiple silos, aboveground chemical storage tanks, and a boiler area. The eastern portion of the property located along Alburdis Avenue is currently improved as a parking lot used for employee parking with approximately 28 parking spaces that is secured with motorized gates, lighting, and block walls.

The former tanker truck route included entrance off Alburdis Street along the northeastern portion of the site and exit along Artesia Boulevard. Additional tanker truck exit routes included an exit along Fallon Avenue. One small area of landscaping is located along the northwestern corner of the site along Fallon Avenue adjacent to the employee parking lot. There are no on-site surface water bodies.

Table 2 provides an overview of physical setting and utility information for the site.

<b>Table 2: Physical Setting and Utility Information</b>		
<b>Conditions</b>	<b>Source</b>	<b>Description</b>
<b>Topography</b>		
Elevation (above mean sea level)	USGS topographic map; Google Earth	The perimeter of the site is approximately 55 to 56 feet, while the center of the site (near the drain inlet) is approximately 54 feet.
Topographic Gradient	USGS topographic map; visual observations; Google Earth	Relatively flat on-site with graded contours directing groundwater flow to the center of the site. Regional topography slopes gently downward to the south.
Local Land Use	Visual observations	<p>The facility is located in a mixed residential and industrial/commercial land use area.</p> <p><u>North</u>: Property owned by RMH Enterprise, LLC (occupied by Pro-Tech Knives), beyond which is Albutis Avenue, followed by industrial/commercial businesses including Pack-Aid (a packaging supply store) and ERS Industrial Cleaning Equipment (a truck/equipment dealer).</p> <p><u>East</u>: Albutis Ave, beyond which is an office building owned by Artesia City, the parking area associated with the subject site, and commercial/industrial businesses (including Social Diesel Repair [truck repair shop], RC Body &amp; Paint [auto body shop], and National Ready-Mix Concrete).</p> <p><u>South</u>: Artesia Boulevard, beyond which are commercial businesses including an autobody shop, tax preparation service, sports medicine clinic.</p> <p><u>West</u>: Fallon Avenue, beyond which are a number of commercial businesses (including London's Pub and Grill, Ree's Mask Shop, Cal Plate [printing equipment and supplies], A&amp;Z Electric) and multi-family residences.</p> <p>Vicinity properties are further discussed in Section 7.</p>
Nearest Residence	Visual observations	Adjacent to the west of the site across Fallon Avenue.
<b>Hydrology</b>		
Storm Water Runoff	Visual observations	<p>The site maintains a storm water discharge permit. Storm water is directed from the rooftops and into to a main sewer system drain located within the center of the site. The channeled storm water is analyzed for certain substances (pH, total dissolved solids, etc.) prior to release into the sewer system.</p> <p>In the event of a large rainfall event, a storm water diverter system diverts excess storm water via sheet flow to Artesia Boulevard, where it is diverted into to the municipal storm sewer system.</p>

<b>Table 2: Physical Setting and Utility Information</b>		
<b>Conditions</b>	<b>Source</b>	<b>Description</b>
Nearest Surface Water Body to the Site	USGS topographic map; Visual observations	San Gabriel River located approximate 1.25 miles east of the site at its nearest point. The San Gabriel River ultimately discharges to the Pacific Ocean near Long Beach.
Flood Plain	FEMA*; Facility personnel	Facility personnel reported no known occurrences of flooding at the site. The site is located within a 500-year flood zone but outside of a 100-year flood zone.
Wetlands	NWI*; Visual observations	There are no federally-designated wetlands on-site. Ramboll did not identify any obvious suspected wetlands at the site during the site visit.
<b>Geology and Hydrogeology</b>		
Presumed Direction of Shallow Groundwater Flow	USGS topographic map; 2020 Phase II ESA, GeoTracker database	Based on topography and a review of environmental reports from nearby properties found in the California GeoTracker database, groundwater is anticipated to flow in a southwesterly direction.
Depth to Groundwater	2020 Phase II Environmental Site Assessment	During the 2020 Phase II ESA conducted by GHD Services Inc. (GHD), groundwater was encountered at depths ranging from 11 to 17 feet below ground surface (bgs). The 2020 Phase II ESA report also indicates that based on environmental reports from nearby properties found in the California GeoTracker database, groundwater was anticipated to be encountered at 10 to 20 feet bgs.
On-site Wells	Facility personnel; Visual observations	No production, monitoring, or oil or gas wells are located on the site.
Nearest Groundwater Supply Wells	Database report	Nine federally registered wells are present within one mile of the site. One is registered as a public supply well. Approximately 150 private or municipal wells that may be used for water supply are located within one mile in all directions from the site. The database report also identified three oil and gas wells located northwest (2,933 feet), east-northeast (3,401 feet), and northwest (4,904 feet) of the subject site.
Geologic Conditions	Ramboll 2021 Subsurface Sampling	During Ramboll's Phase II soil vapor investigation, on-site soils were described as primarily gravel, sand, sandy silt, and silty sand from the surface to 5 feet. Regional soils are well drained sandy loams with moderate infiltration rates.

<b>Table 2: Physical Setting and Utility Information</b>		
<b>Conditions</b>	<b>Source</b>	<b>Description</b>
<b>Site Utility Information</b>		
Heating and Cooling Equipment	Facility personnel	The majority of the site is not heated. Office areas are heated by packaged units.  The building is cooled with four cooling towers located in the central portion of the site as well as multiple packaged air conditioning units. A fifth cooling tower contains ammonia and is used in connection with the processing plant.
Natural Gas Service	Facility personnel	The site is provided with natural gas service.
Use of Fuel Oil for Building Heat	Facility personnel	No known current or former use of fuel oil for building heat.
Foam-based Fire Suppression System	Facility personnel	According to facility personnel, the site is not equipped with a built-in foam-based fire suppression system.
Water Supply	Facility personnel; City personnel	The facility receives drinking and process water from the City of Artesia.
Sanitary Sewer	Facility personnel	The facility discharges sanitary wastewater and treated process water to the municipal sanitary sewer system. See Section 3.2.3 for more information on the discharge of process wastewater.
Septic Systems	Facility personnel	No identified current or former septic systems.
<p>Notes:</p> <p>FEMA = Federal Emergency Management Agency; NCSS = National Cooperative Soil Survey; NWI = National Wetlands Inventory</p> <p>* - Source was provided in the environmental database report.</p> <p>During the site visit, Ramboll walked or drove by the borders of the properties that are adjacent to the site. Ramboll did not enter the neighboring properties.</p>		

### **3.2 Current Use of Site**

#### **3.2.1 Current Operations**

California Dairies Inc. owns and formerly operated a dairy product processing facility and associated parking lot in Artesia, California. The parcel located along Artesia Boulevard is approximately 3.33-acres and is currently improved as the former California Dairies Inc. manufacturing facility with five buildings totaling over 50,000-square-feet. The buildings include the following: a main processing plant with a maintenance area, office and dispatch building, dryer, evaporator, bagging and dissolved air flotation (D.A.F.) treatment area, dry storage warehouse, and a parts room (former fleet garage). Additional features include tanker truck parking areas, employee parking areas, two truck scales, a

main chemical storage area, DAF control room, a number of silos (raw milk, cow water, finished product and wastewater), a 50,000-gallon wastewater holding tank, various aboveground chemical storage tanks, and a boiler room with a water treatment area. The site includes a 0.248-acre property located across Alburtis Avenue which was utilized as employee parking.

The site has been vacant since operations ceased in June 2020. Maintenance-related chemicals and janitorial supplies (e.g., bleach, hand soap, latex paint, hand sanitizer), were used in small quantities (containers of one gallon and smaller). Facility personnel knew of no use of chlorinated solvents by the facility and the use of such chemicals would not be expected based on the nature of current site operations. According to facility personnel, dairy product processing operations remained generally consistent since at least the 1980s until operations ceased in 2020. Since 2020, the site has remained vacant.

### **3.2.2 Waste Management**

Hazardous wastes were not routinely generated at the site, other than the generation of limited amounts of universal wastes (e.g., fluorescent light bulbs, batteries) and waste oil from processing equipment. The site is registered as a small quantity generator (SQG) of hazardous waste (CAL000008617). Sharp's containers located in the USDA certified laboratory area were removed by a third-party medical waste disposal company. The majority of chemical use at the site included descaling and sanitization of equipment and an ammonia and glycol milk product cooling system. Empty/used chemical drums, totes and cylinders were returned to the manufacturer for reuse.

Nonhazardous waste generated at the site consisted of general trash (paper cardboard, office trash) and spent non-hazardous parts washer. Safety Kleen serviced the parts washer. General facility trash was collected in on-site uncovered dumpsters for removal by CR&R Environmental Services. The dumpsters were located on pavement near the point of generation around the site. One remaining dumpster was observed adjacent to the boiler area during the site visit.

### **3.2.3 Wastewater and Storm Water**

Sanitary wastewater, which included wastewater from bathroom and kitchen areas, was discharged to the municipal sanitary sewer system without treatment.

Process wastewater formerly generated by the facility consisted primarily of milk water (*i.e.*, water generated when milk products are evaporated or concentrated), floor wash water, and silo wash water that was used to clean and sterilize the silos between use. Silo wash water was generated when the silo was emptied of liquid substance (e.g., raw milk, cow water, milk product) and the silo required cleaning and sterilization. Sump pumps are used throughout the site to transfer water from discharge area to a treatment area. A mixture of cow water, caustics and/or acids, and City of Artesia water was released into the silo to clean and disinfect the silo and associated piping before reuse. All wash water was reused or directed to either the DAF system or a 50,000-gallon holding tank located along the southwestern edge of the site. The DAF system treated the wash water using chemical coagulation and flocculation. Process wastewater was then pumped into a series of tanks where pH was adjusted prior to discharge to the City of Artesia sewer system. The effluent was monitored and sampled on a routine basis by the City of Artesia and Innovative Consultants Incorporated.

The site maintains a storm water discharge permit. Storm water is directed from the rooftops and into a main sewer system drain located within the center of the site through. The directed storm water is analyzed for certain substances (pH, total dissolved solids, etc.) prior to release into the sewer system. Additional stormwater discharge points are located on the southeastern and southwestern portions of the site.

In the event of a large rainfall event, a storm water diverter system diverts excess storm water from the discharge drain inlet in the center of the site to sheet flow to Artesia Boulevard, where it is diverted into the municipal storm sewer system.

The site was issued a Notice of Violation (NOV) for Waste Discharge System (WDS) effluent limitation violations associated with the discharge of biological oxygen demand (BOD) and chlorine containing wastewater in 2006. In 2008, the site terminated the WDS permit because the wastewater from the milk evaporators was directed to the sanitary sewer system after treatment instead of the stormwater system.

#### **3.2.4 Air Emissions**

Air emissions from the facility included combustion products resulting from the operation of the site's two natural gas-fired boilers, four evaporators, a four-story high dryer, as well as cyclones and scrubbers. Additional emissions included limited emissions from minor welding operations and dry goods bagging operations.

## 4. REVIEW OF PUBLIC RECORDS AND OTHER INFORMATION SOURCES

### 4.1 Environmental Regulatory Database Review

Ramboll contracted with EDR in December 2021 to prepare a summary of listings in federal and state agency databases for the site and facilities within applicable radii of the site, as specified by the ASTM standard.<sup>1</sup> A copy of the EDR database search report is presented in Appendix B.

#### 4.1.1 Database Review for Site

Ramboll reviewed the results of the state and federal environmental database searches performed by the third-party database provider (see Appendix B) and searched the California GeoTracker and EnviroStor databases. The site is listed on several environmental databases, as discussed in Table 3.

<b>Table 3: Summary of Environmental Database Listings for the Site</b>	
<b>Summary of Information Contained in Database</b>	<b>Ramboll’s Comments</b>
<p>The site is listed on the GeoTracker database as a Leaking Underground Storage Tank (LUST) cleanup site. According to the listing, a gasoline leak was discovered on 7/30/1987 which potentially impacted groundwater. California Milk Producers is listed as the claimant under the LUST CUF Claim Status. The status for the incident is listed as completed – as closed as of 2/7/1997.</p>	<p>According to the previous Ph I prepared for the site, four historical USTs were removed from the site, however closure documentation was not available. The Ph I indicated all former USTs were removed from the site. The site received closure from the RWQCB on 2/7/1997. This matter is further discussed in Section 7.</p>
<p>California Milk Producers is also listed on the UST, Statewide Environmental Evaluation and Planning System (SWEEPS UST), Historical UST (HIST UST), HIST CORTESE, and CORTESE Hazardous Waste &amp; Substances Sites List databases.</p> <p>The historical SWEEPS UST database lists seven tanks formerly located at the site. The contents listed vary from diesel to not reported.</p> <p>The HIST UST listing notes seven tanks including four 10,000-gallon tanks containing diesel (year installed not reported), two 10,000-gallon tanks containing diesel (installed in 1978, likely two of the same tanks listed previously), and a 500-gallon tank containing waste oil (installed in 1981).</p> <p>The CA Facility Inventory Database UST database (facility ID 19001558) listing status is listed as active.</p> <p>The HIST CORTESE database (registration ID I-01249), CORTESE, and California Environmental Reporting System (CERS) database listings pertain to the previously discussed LUST cleanup site with the cleanup status listed as completed – case closed (global ID T0603702769).</p>	<p>As noted above, at least four USTs were located and removed from the site. Although both the SWEEPS UST and HIST UST listings state seven historical USTs, it is likely multiple listings were issued for the same tank. Facility personnel indicated no remaining tanks were at the site.</p>

<sup>1</sup> EDR uses the term “radii” to refer to the ASTM terminology “approximate minimum search distance” in the environmental database report.

<b>Table 3: Summary of Environmental Database Listings for the Site</b>	
<b>Summary of Information Contained in Database</b>	<b>Ramboll's Comments</b>
California Milk Products is listed on the Enforcement (ENF), Waste Discharge System (WDS), and California Integrated Water Quality System (CIWQS) databases.	The site was listed on the ENF database associated with WDS effluent limitation violations in 2006. The site terminated its WDS permit that allowed for discharge of treated condensate water from milk evaporators to the storm drain because the wastewater was redirected to the sanitary sewer system following treatment. No other violations were associated with the CIWQS.
<p>1x California Milk Producers Inc is listed in the HWTS and RCRA databases as a non-generator/no longer regulated (NonGen/NLR). The generator numbers noted on the HTWS database include EPA ID CAC000072629 (inactive date of 10/25/2000) and EPA ID CAC000857104 (inactive date of 10/25/2000).</p> <p>The NonGen/NLR (EPA ID: CAL000008617) was issued on 11/14/1989. Owner/operators include Thomas Williams and California Dairies, Inc.; California Dairies, Inc. is also listed as a historic generator (not a generator as of 11/14/1989). No violations or evaluations are listed.</p>	The listing does not suggest a contamination concern to the site. Hazardous waste generation is further discussed in Section 3.2.2.
<p>Notes:</p> <p>* The site is also listed on the following databases related to regulatory compliance: Toxics Release Inventory System (TRIS), Enforcement and Compliance History Online (ECHO), Emissions Inventory (EMI), California Environmental Reporting System (CERS), Integrated Compliance Information System (ICIS), National Pollutant Discharge Elimination System (NPDES), hazardous facility and manifest system (HAZNET), and Facility Index System/Facility Registration System (FINDS). Listings on these databases, by themselves, are not necessarily indicative of contamination.</p>	

#### **4.1.2 Database Review for Adjoining Properties**

Based on a review of the environmental database search report, Ramboll identified the adjoining sites listed in Table 4 on databases indicative of a potential contamination concern.

**Table 4: Contamination-Related Database Listings for Adjoining Properties <sup>1</sup>**

<b>Listing Name or Address and Location Relative to the Subject Site</b>	<b>Summary of Information Contained in Database</b>	<b>Ramboll's Comments</b>
<p>JMC Truck Repair/SoCal Diesel Repair 17224 Alburdis St (Adjoining to the east across Alburdis Street, and adjacent to the south of the parking lot parcel)</p>	<p>JMC Truck Repair is listed in the CERS database (name includes SOCIAL DIESEL REPAIR, LLC) with the CERS description listed as chemical storage facilities (CERS ID 10279633 and site ID 437836). The listing includes a number of violations which the facility has returned to compliance.</p> <p>JMC Truck Repair is also listed in the CERS HAZ WASTE database as a hazardous waste generator.</p> <p>Social Diesel Repair LLC is also listed in the RCRA NonGen/NLR database.</p>	<p>The listings do not suggest a contamination concern to the site. Ramboll recommends no further investigation regarding this issue.</p>
<p>National Ready Mixed Concrete 11725 Artesia Blvd (Adjoining to the east across Alburdis Street)</p>	<p>The property is listed in the CERS HAZ WASTE database as a hazardous waste generator.</p> <p>The property is also listed in the SWEEPS UST, CA Facility Inventory Database (FID) UST, LOS ANGELES CO. Industrial Waste and Underground Storage Tank (HMS) and CERS TANKS databases.</p> <p>The property is listed in the CERS database for maintaining and reporting storing hazardous waste and chemicals at the property. The listing includes a number of violations.</p>	<p>The property is not listed on databases indicative of an environmental release, thus these listings do not suggest a contamination concern to the site. Ramboll recommends no further investigation regarding this issue.</p>

<b>Table 4: Contamination-Related Database Listings for Adjoining Properties <sup>1</sup></b>		
<b>Listing Name or Address and Location Relative to the Subject Site</b>	<b>Summary of Information Contained in Database</b>	<b>Ramboll's Comments</b>
George Veroveen Feed Co 11735 E Artesia Blvd (Adjoining to the east across Alburdis Street)	The property is listed on the LUST, LOS ANGELS CO HMS, SWEEPS UST, HIST UST, CA FID UST, CORTESE, HIST CORTESE, and CERS databases. The property experienced a gasoline release which impacted groundwater in 1996. The property received closure from the RWQCB on December 12, 1996. No further information is available on the GeoTracker database.	Ramboll reviewed records available on the Geotracker database. Because the gasoline release to the groundwater was granted regulatory closure, it is reasonable to assume the matter was appropriately evaluated in accordance with regulations in place at the time, and that remaining contamination from the cross-gradient property, if any, is localized and unlikely to migrate at significant concentrations onto the site. Ramboll recommends no further investigation regarding this issue.
Cal Plate 17110 Jersey Ave (Adjoining to the northwest)	The property is listed in the HWTS, CERS, LOS ANGELES CO. HMS, CERS HAZ WASTE and RCRA-SQG database. The CERS listing includes a number of violations from 2014 2018 for which the facility appears to have returned to compliance.  The property is listed as a RCRA-SQG of hazardous wastes (EPA ID: CAD983636242). No violations or evaluations re listed.	These listings do not suggest a contamination concern to the site. Ramboll recommends no further investigation regarding this issue.
Strongbox Industries 17203 Fallon Ave (Adjoining to the west across Fallon Avenue)	The property is listed in the LUST, CORTESE, HIST CORTESE, and SWEEPS UST databases.  A leak was discovered from piping on 12/08/1988 during tank closure, and it was reported on 5/11/1989 (facility ID R-14475). The potential contaminant of concern is listed as gasoline with soil being listed as the potential media impacted. The status is listed as completed – case closed as of 10/01/1990 (old case # is listed as 102089-03.	Ramboll reviewed records available on the Geotracker database. Because the gasoline release to the soil was granted regulatory closure, it is reasonable to assume the matter was appropriately evaluated in accordance with regulations in place at the time, and that remaining contamination, if any, is localized and unlikely to migrate at significant concentrations onto the site. Ramboll recommends no further investigation regarding this issue.

**Table 4: Contamination-Related Database Listings for Adjoining Properties <sup>1</sup>**

<b>Listing Name or Address and Location Relative to the Subject Site</b>	<b>Summary of Information Contained in Database</b>	<b>Ramboll's Comments</b>
<p>Elroy Painting Contractor 17220 Jersey (Adjoining to the west across Fallon Avenue)</p>	<p>The property is listed in the Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) (SLIC: 0135) as a cleanup program site related to VOCs (global ID SLT4307977) in 1965. Shallow soil contamination was noted in the no further action (NFA) letter. The facility status is listed as no further action required as of 6/16/1965.</p> <p>The property is also listed in the CERS database as a cleanup program site (site ID 188691 and CERS ID SLT4307977).</p>	<p>Based on the case closed status and the soil only impacts, it's unlikely that this cased closed property has adversely impacted the site. Ramboll recommends no further investigation regarding this issue.</p>
<p>O'Brien Cal Cogen Ltd 17306 Fallon Ave (Adjoining to the west)</p> <p>John Wynega 11645 Artesia Blvd (Adjoining to the west)</p> <p>Ms Claudia Covert 11655 Artesia Blvd (Adjoining to the west)</p>	<p>The three properties are listed on either the UST or SWEEPS UST databases only.</p>	<p>Based on the lack of listing on a database of environmental concern, these off-site properties are unlikely to pose a contamination concern to the site and is not discussed further herein. Ramboll recommends no further investigation regarding this issue.</p>

Notes:

<sup>1</sup> Ramboll's analysis of adjoining sites was based on observations made during the site reconnaissance (as discussed in Table 2) and location information for off-site listings as presented in the database report. Also, for purposes of this analysis, Ramboll considers as "adjoining" properties that are adjacent, even if separated by a road or other physical barrier. Ramboll has not included a discussion of compliance-related databases in this table, as Ramboll considers it unlikely that off-site properties listed on compliance-related databases without indication of a release or chemical mishandling represent a potential risk for contamination to the subject site.

<sup>2</sup> The RGA databases are EDR proprietary databases that identify prior versions of the database in which a site was listed. Recovery Act (RCRA) database as a non-generator of hazardous waste.

#### **4.1.3 Database Review for Other Surrounding Properties**

There are several listings in the environmental database report for non-adjointing off-site facilities within applicable ASTM search radii; however, Ramboll has only identified one property that is likely to represent a potential contamination concern to the site.

PRL Glass Systems 177004 Albutis Avenue is located approximately 364 feet north-northwest of the site. The property is listed on the CPS-SLIC database due to a release of VOCs (namely PCE and trichloroethene [TCE]) to soil and groundwater. The property is under active oversight of the RWQCB. According to documents reviewed on GeoTracker, the property is conducting groundwater and subsurface soil vapor monitoring activities. The area of concern appears to be limited to the northeast portion of the property. The extent of the groundwater contamination has not been delineated, however groundwater flow reported at the property is from the northeast to the southwest, away from the site. Based on the available information, there is no indication that contamination from the off-site property is migrating to the site. The contamination is being addressed with regulatory oversight. There were no poor or inadequate addresses ("orphan sites") listed on the EDR database. Ramboll concludes that this facility is unlikely to represent an environmental concern to the site and recommends no further investigation regarding this issue.

#### **4.2 Historical Uses of the Site and Adjacent Properties**

##### **4.2.1 Past Uses of the Site**

The site was either utilized for agriculture or naturally vegetated land from the late 1800s through the early 1940s. By 1947, the south-eastern portion of the site appears utilized for either warehousing or light industrial purposes. The southern and eastern portions of the dairy processing facility were first developed in the early 1950s, while the central and northern portions of the site appear utilized as residential land. The site appears to be occupied by the present day dairy manufacturing facility since at least the mid-1970s. The parking lot property along the eastern portion of the site across from Albutis Avenue appears as residential from at least the 1950s through the 1980s when it was converted into a parking lot.

A summary of Ramboll's key observations from the available historical sources is presented in Table 5.

**Table 5: Summary of Key Observations from Historical Sources for the Site**

Historical Source	Key Observations Regarding Site History
<p>Aerial Photographs (1928, 1938, 1947, 1952, 1963, 1970, 1977, 1983, 1989, 1994, 2002, 2005, 2009, 2012 and 2016)</p> <p>Satellite Imagery <sup>1</sup> (1985 to 2021)</p>	<p><u>1709 Artesia Boulevard</u></p> <p>The 1928 and 1938 aerial photographs depict the parcel as either naturally vegetated or agricultural land. In 1947, a rectangular industrial or warehouse structure is depicted at the southeast corner of the parcel, and a dirt road appears present that extends from the northern parcel boundary. By 1952, the industrial or warehouse structure appears larger in configuration. Additional structures on the site appear to be approximately five residential dwellings located along the western and northern portions of the site. The 1963 and 1970 photographs depict the southern portion of the site as developed with commercial and/or industrial buildings while the central and northern portions of the site appear occupied by single and multi-family residences. The southwestern corner of the site appears utilized as a paved parking lot. Multiple tanker trucks appear along the eastern portion of the site adjacent to the industrial building. Silos first appear at the site in 1970.</p> <p>The 1977 photograph depicts the site with multiple structures similar to present day configuration, however a rectangular building appears in the northwestern portion of the site in the present day employee parking lot and the southwestern corner of the site remains a parking lot. Additional silos appear in the 1983 photograph. The 1989 and subsequent photographs depict the site similar to present day configuration.</p> <p><u>17208 And 17212 Albutis Avenue</u></p> <p>The 1928 and 1938 aerial photographs depict the present-day parcels as either naturally vegetated or agricultural land. By 1952, the parcels appear to be developed for residential use with two residential sized structures. The parcel appears to remain residential until 1989. In the 1989 aerial photograph, the parcels appear to be developed as a parking lot. The aerial photographs are limited in quality but appear to depict the parking lot with no structures through 2016. An approximately forty square foot area of staining appears visible in satellite imagery in September 2018. No staining is depicted in September 2019. No environmental concerns are noted.</p>
<p>Topographic Maps (1896 to 2018)</p>	<p><u>1709 Artesia Boulevard</u></p> <p>A residential sized structure is depicted at the western portion of the site from as early as 1896 through 1902. No development is depicted from 1923 to 1945. By 1947, a structure appears at the southern portion of the parcel. By 1949, one rectangular shaped structure is present at the southeast corner of the parcel. In the 1964 and subsequent maps, the site is depicted as located within a built up area and no structures are depicted at the site.</p> <p><u>17208 And 17212 Albutis Avenue</u></p> <p>A small residential sized structure appears at the parcel from 1896 through 1902. The 1923 through 1949 maps do not depict structures at the parcel. By 1950 the site is depicted as part of a developed area. No environmental concerns are noted.</p>
<p>City Directory Abstracts (1965, 1994, 1999, 2000, 2006, 2009, and 2004)</p>	<p>The occupants of the site are listed as:</p> <p><u>171709 Artesia Boulevard.</u></p> <p>California Milk Producers (1994), California Milk Producers Main Plant (1999), CA Dairies Inc (2006), and California Milk Producers (2009), California Dairies Inc (2014)</p> <p><u>11709 Artesia Boulevard East</u></p> <p>CA Milk Producers (2000)</p>

<b>Table 5: Summary of Key Observations from Historical Sources for the Site</b>	
<b>Historical Source</b>	<b>Key Observations Regarding Site History</b>
	<p><u>17212 Alburdis Avenue:</u> Mary L Castodio (1964) City directory information was not provided for 17208 Alburdis Venue.</p>
Chicago Title Company	According to the preliminary report from the Chicago Title Company, the title to the property at Artesia Boulevard (APN 7035-016-064) and the property at Alburdis Avenue (APNs: 7035-020-056 and 7035-020-057) comprising the subject site is said to be vested in California Milk Producers, a California corporation.
Los Angeles County Assessor Portal	Los Angeles County Assessor records available online indicate that the AINs for the site are 7035-016-064 for the western parcel and 7035-020-057, and 7035-020-056 for the eastern parking lot parcels.
<p>Notes:</p> <p><sup>1</sup> In addition to aerial photographs provided by EDR, Ramboll viewed historical satellite imagery provided via Google Earth. Printed copies were not obtained, and imagery dates were not independently verified.</p> <p>EDR reported that Sanborn fire insurance map coverage is not available for the site.</p>	

#### 4.2.2 Past Uses of Adjacent Properties

The properties in the vicinity of the site have primarily been used for agricultural or residential purposes from the early 1920s through the 1950s. By 1952 the vicinity appears a mix of residential properties to the west and commercial or light industrial to the east. A concrete manufacturing plant appears east of the site by the 1960s. The vicinity appears largely a mix of light industrial (north and east), commercial (south) and residential (west) properties from the 1980s to present day.

#### 4.3 Review of Local and State Agency Information

Ramboll visited or otherwise contacted local governmental agencies and regulatory bodies for information relating to the site. An overview of the findings of this review is presented in Table 6.

<b>Table 6: Local Agency Information for the Site</b>	
<b>Agency Contacted / Document Reviewed</b>	<b>Information Obtained</b>
Los Angeles County Assessor Portal	<p>Los Angeles County Assessor records available online indicate that the AINs for the site are 7035-016-064 for the western parcel and 7035-020-057, and 7035-020-056 for the eastern parking lot parcels.</p> <p>The western parcel's "use code" listed a one story beverage industrial food processing plant. Additional "use codes" include a commercial office building, a parking lot, and a warehouse. The initial 12,272 square foot processing plant was constructed in 1950. A 14,000-square foot parking lot was constructed at the site in 1958. The 6,814 square foot warehouse and additional 1,057 square foot industrial plant buildings were constructed in 1960. The 7,147 square foot commercial office building is listed as constructed in 1966 and renovated in 1976.</p> <p>The eastern parking lot parcels were constructed as a 10,800 square foot conjoined parking lot in 1989.</p>

**Table 6: Local Agency Information for the Site**

Agency Contacted / Document Reviewed	Information Obtained
City of Cypress Building Department/City Clerk's Office	Ramboll requested information from the building department regarding building records including all building permits and certificates of occupancy. As of the date of this report, a response had not been received from the building department
Los Angeles County Fire Department-Health Hazardous Materials Division	Ramboll requested information from the fire department health hazardous materials division concerning the utilization, manufacture, storage and/or discharge of hazardous materials/waste, and any information concerning previous or on-going site investigations/remediations pertaining to hazardous materials/waste. As of the date of this report, a response had not been received from the fire department.

#### 4.4 Previous Environmental Assessments and Activities

Based on a review of historical site documents and interviews with facility personnel, prior environmental assessment and UST removal activities have been conducted at the site, as summarized below. Pertinent historical and site-related information contained in the prior report has been incorporated into other sections of this report.

- 2020 Phase I ESA.** In July 2020, GHD, in association with investigating Business Environmental Risk (BER), conducted a Phase I ESA at the site. The Phase I ESA report did not identify the presence of any RECs at the site, however GHD did note five findings. The findings included historical on-site structures, historical site use, potential agricultural chemical impacts from historical operations, former on-site diesel and gasoline UST releases, and potential migration of impacts from an adjoining concrete manufacturing facility.
- 2021 Phase II Environmental Site Assessment (ESA).** Based on information gathered during the prior Phase I ESA, GHD conducted a Phase II subsurface investigation at the property located at 11709 East Artesia Boulevard that included the drilling of six soil borings throughout the parcel which were advanced to 25 feet bgs; grab groundwater samples were collected from each boring. The soil samples were analyzed for VOCs, semi-volatile organic compounds (SVOCs), organochlorine pesticides, polychlorinated biphenyls (PCBs), herbicides, CAM 17 metals, and Total Petroleum Hydrocarbons (TPH). Groundwater samples were analyzed for ammonia, nitrates and nitrites, CAM 17 metals, TPH, VOCs, and SVOCs.

GHD results indicated that limited amounts of pesticides (e.g., 4,4'-DDE maximum detection-12 µg/kg) and VOCs are present in soil; however, none of the concentrations exceed appropriate ESLs for the site (i.e., industrial/commercial land use). Metals detected in soils which exceeded the appropriate ESLs included arsenic, lead and vanadium (maximum detection-197,000 micrograms per kilogram [µg/kg], 57,800 µg/kg, and 47,700 µg/kg respectively). No VOCs were detected in groundwater; metals detected in groundwater which exceeded MCLs were limited to mercury (3.31 micrograms per liter [µg/L]). Ammonia and nitrate (maximum levels 648 µg/L, 94,00 µg/L) were also present in the groundwater, and in some locations, nitrate exceeded EPA MCLs.

#### **4.5 Interviews**

During the site inspection, an interview was conducted with personnel responsible for management of the site. Frank Noriega, the Assistant Plant Manager of California Dairies Inc. since 1980, indicated the site has been a dairy processing facility since at least 1980.

#### **4.6 User-Provided Information**

Ramboll provided Artesia & Flallon, LLC and Borstein Enterprises with a User Questionnaire (consistent with Appendix X3 of the ASTM Standard) that requested information relating to environmental liens, activity use limitations (AULs), specialized knowledge of the site, property value diminution, chain-of-title, or any other commonly known or obvious indications of site contamination, that was not otherwise provided to Ramboll. The User did not provide any information that was not otherwise obtained and reviewed by Ramboll.

## 5. SITE RECONNAISSANCE

### 5.1 Methodology and Limiting Conditions

Ramboll conducted a visit to the site on December 13, 2021. During the site visit, observations of both the interior of the buildings and exterior portions of the site were made to evaluate if any RECs, as defined in Chapter 7, are present. Ramboll did not observe the roofs of the buildings.

### 5.2 General Site Setting and Observations

Ramboll made observations concerning the interior and exterior issues specified in Sections 9.4.2 through 9.4.4 of the ASTM E1527-13 Standard. The presence or absence of each issue of environmental interest or concern is noted in Table 7. Additional information regarding observed and historical items is provided in the sections following the table.

<b>Table 7: Summary of Site Reconnaissance Observations</b>		
<b>ASTM Section</b>	<b>Issue</b>	<b>Observation</b>
<b>Interior and Exterior Issues</b>		
9.4.2.1	Current use(s) of the site	See Section 3.2
9.4.2.2	Past use(s) of the site	See Section 4.2
9.4.2.3	Hazardous substances and petroleum products used, treated, stored, disposed of, or generated on the property in connection with identified present or past uses	<b>Present/Formerly Present</b> (see Section 5.2.1)
9.4.2.4	Storage tanks: Underground storage tanks (fill ports, vent pipes, manholes) Aboveground storage tanks	(see Sections 5.2.2 and 5.2.3) <b>Formerly Present Present</b>
9.4.2.5	Odors (strong, pungent or noxious)	Absent
9.4.2.6	Pools of liquid, standing surface water or sumps	<b>Present</b> (see Section 5.2.4)
9.4.2.7	Drums of hazardous substances or petroleum products (five-gallon, 55-gallon or totes)	<b>Formerly Present</b> (see Section 5.2.1)
9.4.2.8	Hazardous substance and petroleum product containers (not necessarily in connection with identified uses)	<b>Present</b> (see Section 5.2.1)
9.4.2.9	Unidentified substance containers suspected of containing hazardous substances or petroleum products	Absent

<b>Table 7: Summary of Site Reconnaissance Observations</b>		
<b>ASTM Section</b>	<b>Issue</b>	<b>Observation</b>
9.4.2.10	Polychlorinated biphenyls (PCBs) Electrical equipment on-site (e.g., transformers, capacitors) Electrical equipment known or likely to contain PCBs Hydraulic equipment on-site (e.g., elevators, truck dock lifts) Hydraulic equipment known or likely to contain PCBs	(see Section 5.2.5) <b>Present</b> Unlikely <b>Present</b> Unlikely
<b>Interior Issues</b>		
9.4.3.1	Heating/cooling systems	<b>Present</b> (see Table 2)
9.4.3.2	Stains or corrosion on interior floors, walls or ceilings (except for staining from water)	<b>Present</b> (see Section 5.2.6)
9.4.3.3	Floor drains and interior sumps	<b>Present</b> (see Section 3.2.3)
<b>Exterior Issues</b>		
9.4.4.1	Pits, ponds or lagoons on property or adjacent sites	Absent
9.4.4.2	Stained soil or pavement	Absent
9.4.4.3	Stressed vegetation (from other than insufficient water)	Absent
9.4.4.4	On-site solid waste disposal; areas apparently filled or graded by non-natural causes; or mounds or depressions suggesting solid waste disposal	Absent
9.4.4.5	Wastewater or other liquid (including storm water) or any discharge into a drain, ditch, underground injection system or stream on or adjacent to the property	<b>Present</b> (see Section 3.2.3)
9.4.4.6	Wells (including dry wells, irrigation wells, injection wells, abandoned wells, or other wells)	Absent
9.4.4.7	Septic systems or cesspools	Absent
<b>Non-Scope Considerations</b>		
N/A	Asbestos Containing Materials	(see Section 5.2.7)
N/A	Lead-Based Paint	(see Section 5.2.8)
N/A	Water Intrusion	(see Section 5.2.9)

<b>Table 7: Summary of Site Reconnaissance Observations</b>		
<b>ASTM Section</b>	<b>Issue</b>	<b>Observation</b>
N/A	Radon	(see Section 5.2.10)
<p>Notes:</p> <p>Observations noted in this table and discussed further below are based on information obtained during the site visit and from a review of the sources summarized in Section 4.</p> <p>See the ASTM Standard for a detailed description of the issues included in each referenced ASTM section.</p> <p>Per the ASTM Standard, fluorescent light ballasts likely to contain PCBs are not considered.</p> <p>N/A – Not applicable.</p>		

### 5.2.1 Hazardous Substances and Petroleum Products

The majority of the hazardous wastes and chemicals present at the site were removed by Chemco after operations on the site were halted in June 2020. Limited amounts of retail-sized quantities of maintenance chemicals and janitorial chemicals remained in fire safety cabinets and within storage rooms at the site. Small quantities of propylene glycol remain in the cooling system at the site.

Historical hazardous materials and chemicals used at the site included the following: acetylene, propylene glycol, powdered floor treat, citric acid, phosphoric acid, Camco 717 HT, lubricant oil, acid sanitizer 6552, sodium bicarbonate, Chemco 51 (alcohols), surfactant, Flo-Quat, Subdue Plus (alcohols), Commence (benzyl sulfonic acid, sodium carbonate peroxyhydrate, trisodium orthophosphate), Adhere (sodium hydroxide mixture), Enerex 9900C (sodium hydroxide sulfite), Enerex 205L (potassium hydroxide), motor oil, argon, argon/CO2 mixture, oxygen, Tornado (soda ash, sodium hydroxide, pine oil), Chemquest 11596 (etidronic acid), salt crystals, aluminum chlorohydrate water, and ethoxylated alcohol (2020 Phase I).

At the time of the site visit, only empty containers which had previously stored chemicals were present. Pavement beneath all the chemical storage containers and ASTs appeared to be in good condition and no evidence of releases was apparent. Facility personnel indicated that no hazardous wastes are generated currently due to the dairy processing facility being closed (See Section 4.2.1 for previous site activities).

### 5.2.2 Underground Storage Tanks

A total of four USTs were formerly located at the site and were removed around 1997. Pertinent information regarding these USTs is provided in Table 8. The site is listed on the LUST database for a release which impacted groundwater. Further information regarding sampling and closure activities is included in Section 4.1.1.

<b>Table 8: Underground Storage Tanks</b>					
<b>Number and Size (gal.)</b>	<b>Contents</b>	<b>Location</b>	<b>Key Dates</b>	<b>Regulatory Closure Granted?</b>	<b>Notes</b>
<b>Decommissioned/Closed-in-Place/Removed</b>					
2 x 10,000	Diesel fuel	North of Truck Bays	Year of installation unknown, removed by 1997	Yes	Provided fuel for trucks
1 x 10,000	Gasoline	North of Truck Bays	Year of installation unknown, removed by 1997	Yes	Provided fuel for trucks
1 x 500	Used Oil	North of Truck Bays	Installed 1981; removed by 1997	Yes	Non-vaulted, single-walled

### 5.2.3 Aboveground Storage Tanks

Several aboveground storage tanks (ASTs) were formerly maintained at the site, as summarized in the table below. Facility personnel knew of no leaks or spills relating to the tanks, and Ramboll observed no evidence of staining or past releases at the time of the site visit. Facility personnel indicated that all ASTs were decommissioned and emptied by Chemco when the facility ended all operations in June 2020.

<b>Table 9: Aboveground Chemical and Petroleum Storage Tanks and Bulk Containers</b>				
<b>Location</b>	<b># of tanks</b>	<b>Contents</b>	<b>Sizes</b>	<b>Observations</b>
Between Dry Storage and Silo Room	1	Sodium Hydroxide (Dominate)	6,000 gallons	Concrete beneath AST is in good condition and no evidence of spills or releases were observed.
Between Dry Storage and Silo Room	1	Nitric Acid/Phosphoric Acid (Dazzle)	5,000 gallons	Concrete beneath AST is in good condition and no evidence of spills or releases were observed.
In Main Plant	1	Hydrogen Peroxide/Acetic Acid/Peracetic Acid (Chemco PAA)	600 gallons	Tank is located in a bermed area, and the concrete is in good condition. No evidence of spills or releases were observed.

<b>Table 9: Aboveground Chemical and Petroleum Storage Tanks and Bulk Containers</b>				
<b>Location</b>	<b># of tanks</b>	<b>Contents</b>	<b>Sizes</b>	<b>Observations</b>
In Main Plant	1	Sodium Hypochlorite (Flo-Klor)	500 gallons	Tank is located in a bermed area, and the concrete is in good condition. No evidence of spills or releases were observed.
In Ammonia Room	1	Anhydrous Ammonia	2,400 gallons	Concrete beneath AST is in good condition and no evidence of spills or releases were observed.
In Receiving Bay	1	Potassium Hydroxide/Acrylic Acid Sodium Salt Polymer/Sodium Hypochlorite (Triumph NP)	1,000 gallons	Concrete beneath AST is in good condition and no evidence of spills or releases were observed.
In Main Plant	1	Sodium Hydroxide	1,100 gallons	Concrete beneath AST is in good condition and no evidence of spills or releases were observed.
In Main Plant	1	Sulfuric Acid	16,880 gallons	Concrete beneath AST is in good condition and no evidence of spills or releases were observed.
In Hazardous Waste and Chemical Storage area	1	Used oil	600 gallons	The tank is double-walled and is on top of secondary containment. No evidence or spills or releases were observed.
Cow Water Silos	7	Cow water (water removed from raw milk)	5,000-10,000 gallons	Concrete beneath ASTs is in good condition and no evidence of spills or releases were observed.
Around Silo Room	11	Raw milk	30,000-50,000 gallons	Concrete beneath ASTs is in good condition and no evidence of spills or releases were observed.
West of Silo Room	1	Wastewater	50,000 gallons	Concrete beneath ASTs is in good condition and no evidence of spills or releases were observed.

#### **5.2.4 Pools of liquid, standing surface water or sumps**

Multiple areas of shallow standing water were present within the silo room and bagging area. This water, which is present in a low-lying area within the pavement, was the result of either a precipitation event during the site visit or from historical equipment wash water. A visual evaluation of the water surface identified no oil sheen or loose debris.

### **5.2.5 Polychlorinated Biphenyls (PCBs)**

Facility personnel knew of no on-site equipment that is known to contain polychlorinated biphenyls (PCBs). Four pad-mounted and four pole-mounted transformers are present on the site and are owned by Southern California Edison. The units are not labeled as to their PCB content. Because the installation dates of the units are unknown and may predate the 1979 federal ban on the manufacture of PCBs, it is possible that the transformer oils contain PCBs. However, manufacturing dates of two of the transformers located in the central portion of the site indicate a manufacturing date after 1979.

As noted above, one hydraulic elevator is located in the office area in the southwestern corner of the site. Given that the hydraulic oil for the elevator is expected to have been routinely replaced by the elevator service company, it is unlikely that the hydraulic oil contains PCBs. No evidence of staining or releases was observed near the hydraulic oil reservoirs. Facility personnel indicated that no spills or releases have occurred within the elevator room and the elevator is maintained by a third-party.

Because the buildings were constructed prior to the 1979 federal ban on the manufacture of PCBs, it is possible that hydraulic oils, or other types of electrical equipment, such as capacitors, contain PCBs. Ramboll observed no indication of leaks or releases from electrical equipment during the site visit.

### **5.2.6 Stains or Corrosion on Interior Floors, Walls or Ceilings**

Ramboll observed evidence of minor pavement staining in the evaporator rooms, the hydraulic elevator room, the silo rooms, the maintenance shop, and the ammonia room. This staining appeared to be leaked milk products is likely not indicative of widespread releases or losses. Brick-paved and concrete floors in the vicinity of the observed staining appeared to be in good condition, with no visual evidence of cracking.

### **5.2.7 Asbestos-Containing Materials (ACMs)**

Although an asbestos inspection and sampling of suspect building materials in conformance with established protocols (as outlined in 40 CFR §763), applicable state or local regulations, or industry standards, were beyond our scope of work, Ramboll made limited visual observations<sup>2</sup> of representative building materials in those areas accessed during the site tour to identify readily apparent PACM and suspect ACM. OSHA's definition of PACM is limited to thermal system insulation (TSI) and surfacing materials present in buildings constructed before 1981. Vinyl floor tiles are not considered PACM, but OSHA nonetheless requires that asphalt and vinyl floor tiles present in buildings constructed before 1981 be treated similarly to PACM. The term suspect ACM is not defined by OSHA but can include numerous building materials manufactured using asbestos currently or in the past (e.g., ceiling tiles, roofing materials, joint compound), as well as TSI, surfacing materials, and flooring materials installed after 1981. Facility personnel indicated a recent ACM survey was conducted at the site, however Ramboll was not provided with a copy of the report or the results of the survey.

Because the buildings at the site were constructed prior to 1981, TSI, surfacing materials and vinyl/asphalt flooring must be treated as PACM. During the site visit, PACM observed by Ramboll included vinyl floor tile in the office building and TSI associated with the piping. In addition, Ramboll observed other materials potentially considered suspect ACM (e.g., ceiling tile and building insulation). Also, based on the building age, the roofing materials may be considered suspect ACM. According to the EDR database, the site exported an unreported amount of asbestos containing waste in 1988.

---

<sup>2</sup> Ramboll did not observe all building materials or formally survey the facility to determine the presence and condition of PACM and suspect ACM.

There are no regulatory requirements to remove PACM, suspect ACM and known ACM or to confirm whether building materials contain asbestos, unless the materials are damaged and have the potential to release fibers or the materials have the potential to be disturbed during renovation or demolition activities. Ramboll observed certain building materials that were damaged or deteriorating, specifically including patches of deteriorating ceiling tile on the second story of the office building. OSHA requires building owners and employers to identify locations of PACM and confirmed ACM at the facility and comply with certain employee notification, training, labeling and recordkeeping requirements (29 CFR §1910.1001(j)) and housekeeping programs (1910.1001(k)).

#### **5.2.8 Lead-Based Paint**

Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the early 1970s. In 1978, the Consumer Products Safety Commission banned paint and other surfacing coating materials that are "lead-containing paint." Based on the construction date of on-site buildings dating back to approximately 1950, it is possible that lead-based paint was used historically on facility structures. Facility personnel knew of no lead-based paint on structures at the facility. Ramboll observed the paint to be in good condition. According to facility personnel, a LBP survey was conducted at the site, however Ramboll was not provided with a copy of the report to review.

#### **5.2.9 Water Intrusion**

Ramboll did not perform a mold survey at the site; however, facility personnel provided information regarding past water intrusion events. According to facility personnel, only minor roof leaks have occurred, and roof leaks were addressed by third-party contractors. Facility personnel also indicated that there have not been any problems with mold in the past.

#### **5.2.10 Radon**

Based on information included in the environmental database report, the site is located in an area categorized as Zone 2, which has average indoor radon levels between 2 and 4 picoCuries per liter (pCi/L). The United States Environmental Protection Agency's (USEPA's) continuous exposure limit, which is the limit at which further testing or remedial action is suggested, is 4.0 pCi/L. This USEPA continuous exposure limit applies to residential, not commercial, properties. According to the California Radon database, for 8 sites surveyed in the 90701 zip code, no sites had radon present at greater than 4.0 pCi/L. A USEPA survey conducted in the same zip code as the site found that the average radon level of a first-floor room at one site was 0.000 pCi/L.

## 6. PHASE II SUBSURFACE INVESTIGATION

Ramboll conducted a subsurface investigation at the site that included collection of soil and soil vapor samples. The scope for the subsurface investigation focused on areas of concern identified through the course of conducting the Phase I ESA, as described further below.

### 6.1 Pre-field Activities

Prior to commencement of sampling activities, Ramboll contacted Underground Service Alert (USA) to mark the locations of all major utilities near the site boundaries. In addition to the services provided by USA, Ramboll contracted with Ground Penetrating Radar Systems, LLC (GPRS) of Toledo, Ohio, a private utility locating company, to conduct a geophysical survey in the immediate vicinity of the boring locations to identify subsurface structures or underground obstructions.

Ramboll also prepared a site-specific Health and Safety Plan (HASP), designed to minimize exposure of Ramboll field personnel to potentially hazardous materials and coronavirus disease (COVID-19). Field personnel involved in the project were required to implement the procedures presented in the HASP while conducting the fieldwork. All drilling activities were conducted under the direct supervision of a California-registered Professional Geologist. Field activities and sampling results are described below.

### 6.2 Advancement of Soil Borings and Soil Sample Results

On November 2, 2021, Ramboll collected soil samples from three borings (B1 through B3) as depicted on Figure 3. Soil samples were collected at approximately 2, 4, and 6 feet bgs at each of the boring locations. Soil samples were screened using visual and olfactory methods, and by using a photoionization detector (PID). Soil sample containers were labeled, sealed in zip-closure bags, stored on ice in an insulated container, and delivered to Eurofins Calscience of Irvine California, under chain-of-custody documentation. Soil samples were analyzed for total petroleum hydrocarbons (TPH) and pH. It is Ramboll's understanding the proposed use for the site is a mixed-use residential and commercial setting. Accordingly, soil sampling results were compared to both residential and commercial screening levels as presented in Table 10 in Appendix D. Laboratory reports are included in Appendix D. In summary:

- TPH concentrations were reported above laboratory reporting limits in several samples but at low concentrations. No TPH were detected in soil above applicable DTSC/USEPA commercial or residential screening levels.
- pH in soil ranged from 7.7 to 8.9. Soil in California generally ranges in pH from 5 to 8.5, but most are higher than 7. Based on the sampling results, the pH in soil generally appears to be consistent with normal background soil conditions.

### 6.3 Soil Vapor Probe Installation and Sampling Results

On December 1, 2021, ABC Liovin, under the oversight of Ramboll, installed nine (9) soil vapor probes (RSV-1 through RSV-5, and RSV-7 through RSV-10) at the locations depicted on Figure 3. Various attempts were made to install RSV-6, however due to thick concrete and multiple concrete layers, a vapor probe was not installed at location RSV-6. Vapor probes were installed at a depth of approximately 5 feet bgs. Soil vapor probes were installed and sampled in accordance with the "Advisory – Active Soil Gas Investigations", jointly developed by the California EPA (CAL EPA), DTSC, and LARWQCB/SFRWQCB, dated July 2015. On December 3, 2021, the soil vapor samples were collected and analyzed by A&R Laboratories under the supervision of Ramboll. The soil vapor samples

were analyzed for volatile organic compounds (VOCs) by USEPA Method 8260. The sampling results are summarized in Table 11 in Appendix D and depicted on Figure 4. Laboratory reports are included in Appendix D. Results were compared to the screening thresholds listed on Table 11. Ramboll compared the soil vapor sampling results to residential and commercial screening levels using the official attenuation factor (AF) of 0.001 and, for screening purposes, an attenuation factor of 0.03. Multiple VOCs were detected in soil vapor in samples RSV-3, RSV-5 and RSV-10 at low concentrations above their respective screening criteria (Figure 4). RSV-3 is located in the northwestern portion of the site, RSV-5 is located in the central portion of the site, and RSV-10 is located in the southern portion of the site. The sampling results are summarized below:

***Commercial Scenario with Attenuation Factor 0.001***

No VOCs in soil vapor were detected above applicable DTSC/USEPA commercial building screening levels using the official attenuation factor of 0.001.

***Residential Scenario with Attenuation Factor 0.001***

Chloroform was the only VOC detected in soil vapor above applicable DTSC/USEPA residential building screening levels using an attenuation factor of 0.001. Chloroform was detected in one soil vapor sample location (RSV-10) at a concentration of 0.27 micrograms per liter ( $\mu\text{g/L}$ ), exceeding its residential screening threshold of 0.12  $\mu\text{g/L}$ .

***Commercial Scenario with Attenuation Factor 0.03***

Benzene, PCE and chloroform were the only VOCs detected in soil vapor above applicable DTSC/USEPA commercial building screening levels using 0.03 as an attenuation factor for screening purposes. Benzene was detected in RSV-5 at a concentration of 0.030  $\mu\text{g/l}$ , exceeding the screening level of 0.014  $\mu\text{g/l}$ . PCE was detected in RSV-3 at a concentration of 0.13  $\mu\text{g/l}$ , exceeding the screening level of 0.067  $\mu\text{g/l}$ . Chloroform was detected in RSV-10 at a concentration of 0.27  $\mu\text{g/l}$ , exceeding the screening level of 0.018  $\mu\text{g/l}$ .

***Residential Scenario with Attenuation Factor 0.03***

Benzene, PCE, and chloroform were the only VOCs detected in soil vapor above applicable DTSC/USEPA residential building screening levels using an attenuation factor of 0.03. PCE was detected in two samples at concentrations of 0.13  $\mu\text{g/l}$  in RSV-3 and 0.050  $\mu\text{g/l}$  in RSV-5, exceeding the screening level of 0.015  $\mu\text{g/l}$ . Benzene was detected in RSV-5 at a concentration of 0.030  $\mu\text{g/l}$ , exceeding the screening level is 0.003  $\mu\text{g/l}$ . Chloroform was detected in RSV-10 at a concentration of 0.27  $\mu\text{g/L}$ , exceeding the screening level of 0.004  $\mu\text{g/L}$ .

## **6.4 Lithology and Hydrogeology**

The lithology encountered consisted of primarily sandy silt, silty sand and some gravel from the surface to 5 feet bgs. Groundwater was not encountered during this investigation. Boring logs are included in Appendix E.

## **6.5 Summary of Subsurface Investigation Findings**

Based on the results of the limited soil and soil vapor sampling conducted as part of this subsurface investigation, Ramboll has made the following findings:

- TPH were not detected in soil above applicable screening criteria and the pH in soil generally appears to be consistent with normal background conditions. While the sampling results from this investigation did not identify chemicals in soil above applicable screening criteria, the soil should

be managed in accordance with applicable state and federal regulations during potential future soil disturbance activities.

- In soil vapor, benzene, PCE and chloroform were the only VOCs detected above applicable DTSC/USEPA residential and commercial screening levels using 0.03 as an AF. Chloroform was the only VOC detected above applicable DTSC/USEPA residential screening levels using 0.001 as an AF. No VOCs in soil vapor were detected above applicable DTSC/USEPA commercial screening levels using 0.001 as an attenuation factor. The presence of VOCs above screening levels indicate a potential vapor intrusion concern that should be further evaluated through the performance of a human health risk assessment.

## 7. FINDINGS, OPINION, AND CONCLUSIONS

Ramboll performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 and a Phase II subsurface investigation of the site located at 11709 Artesia Boulevard, 17208 and 17212 Albutis Avenue in Artesia, California in December 2021. The objective of the ESA was to identify RECs, as defined in the ASTM Standard. A list of key definitions presented in the ASTM Standard is provided in Chapter 8 at the end of this report. Any exceptions to, or deletions from, this practice are described in Section 7.5.

### 7.1 Findings, Opinions, and Conclusions

#### 7.1.1 Recognized Environmental Conditions

Ramboll has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of the dairy product processing facility located 11709 Artesia Boulevard, 17208 and 17212 Albutis Avenue in Artesia, Los Angeles County. Any exceptions to, or deletions from, this practice are described in Section 7.5 of this report. This assessment has revealed no RECs in connection with the site.

### 7.2 Other Findings

Although not considered to be a REC, Ramboll identified the following notable other finding. The term "other finding" is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.

- **Past Manufacturing Operations at the Site.** Since the early 1950s, the site has been used for milk manufacturing purposes. From the 1970s through at least the 1990s, a tanker truck fleet operated at (and was repaired at) the facility. Milk manufacturing activities may have included the use of petroleum products, acids, caustics, and other chemicals. Multiple subsurface investigations have been conducted at the site, including an August 2020 sampling event conducted by GHD Inc. The results of the GHD sampling indicated that limited concentrations of pesticides (e.g., 4,4'-Dichlorodiphenyldichloroethylene [DDE] at 12 micrograms per kilogram [ $\mu\text{g}/\text{kg}$ ]) and volatile organic compounds (VOCs) are present in soil; however, none of the concentrations exceeded applicable San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels (ESLs) for the site (i.e., industrial/commercial land use). Metals detected in soil which exceeded the applicable ESLs included arsenic, lead, and vanadium (maximum levels 197 milligrams per kilogram [ $\text{mg}/\text{kg}$ ], 57.8  $\text{mg}/\text{kg}$ , and 47.7  $\text{mg}/\text{kg}$  respectively). No VOCs were detected in groundwater; metals detected in groundwater which exceeded California Maximum Contaminant Levels (MCLs) were limited to mercury (3.31 micrograms per liter [ $\mu\text{g}/\text{L}$ ]). Ammonia and nitrate (maximum concentrations of 648  $\mu\text{g}/\text{L}$  and, 94,00  $\mu\text{g}/\text{L}$ , respectively) were also detected in the groundwater, and in some locations, nitrate exceeded Environmental Protection Agency (EPA) Maximum Contaminant Levels (MCLs).

GHD indicated that lead in soils was likely associated with a former waste oil underground storage tank (UST) located in the same area. The mercury and pesticide detections were attributed to historical pesticide use in agricultural activities. Metal detections appeared to be insoluble forms and did not appear to present a risk. Ammonia appeared present at naturally occurring levels, however nitrate was observed at higher concentrations. GHD indicated that elevated nitrate levels were located in the northern portion of the site boundary and attributed the concentrations to an off-site source.

Based on the results from the previous Phase II subsurface investigation, Ramboll conducted a subsequent subsurface investigation at the site that included collection of soil and soil vapor

samples throughout the site. Samples were collected in areas including former employee and truck parking areas, the former underground storage tank (UST) area, the former truck wash area, former chemical storage area, former main plant chemical storage area, former boiler area storage, and former sump pump area. Soil samples were analyzed for total petroleum hydrocarbons (TPH) and pH, while soil vapor was analyzed for VOCs by United States Environmental Protection Agency's (USEPA) Method 8260. Results from the subsurface investigation indicated that total petroleum hydrocarbons (TPH) were not detected in soil above applicable screening criteria and the pH in soil generally appears to be consistent with normal background conditions. While the sampling results from this investigation did not identify chemicals in soil at concentrations above applicable screening criteria, and the issues described above do not rise to the level of being a Recognized Environmental Condition under ASTM E1527-13, as a precautionary measure Ramboll recommends that the soil be managed in accordance with applicable state and federal regulations during potential future soil disturbance activities.

In soil vapor, benzene, tetrachloroethene (PCE) and chloroform were the only VOCs detected above applicable Department of Toxic Substances Control (DTSC)/USEPA residential and commercial screening levels using 0.03 as an attenuation factor (AF), which is used for screening purposes but which is neither an official nor controlling standard. Chloroform was the only VOC detected above applicable DTSC/USEPA residential screening levels using 0.001 as an AF (which is the official / adopted attenuation factor). No VOCs in soil vapor were detected above applicable DTSC/USEPA commercial screening levels using 0.001 as an attenuation factor.

- **Former Diesel Fuel and Gasoline USTs.** Two 10,000-gallon diesel fuel, one 10,000-gallon gasoline, and one 500-gallon waste oil USTs were formerly located along the northern site boundary adjacent to the former truck wash area. According to the GeoTracker website, the site is listed on the Leaking Underground Storage Tank (LUST) database. A gasoline release was reported in August 1987 which impacted groundwater. The Los Angeles Regional Water Quality Control Board (RWQCB) closed the case in February 1997. No records were available regarding the cleanup and subsequent closure of the USTs. Site representatives reported that soil excavation activities were conducted, however, a copy of the report was not available for Ramboll's review. Records regarding the UST closure were requested from the Fire Department but have not yet been received. Therefore, Ramboll is unable to evaluate the adequacy of the UST closure. However, there is no apparent current regulatory requirement to evaluate the area, nor is there scrutiny of the site by regulatory officials. Furthermore, Ramboll's subsurface investigation did not indicate the presence of contamination in the vicinity of the UST – and, therefore, actual data shows the former USTs do not represent a Recognized Environmental Condition. Ramboll recommends no further investigation regarding this issue.

### **7.3 De Minimis Conditions**

*De minimis* conditions are those that do not represent a material risk of harm to public health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies. Ramboll identified no *de minimis* conditions related to the site.

### **7.4 Non-Scope Considerations**

Ramboll identified the following findings that relate to non-scope considerations (as discussed in Section 2.2), as detailed below:

- **Asbestos-Containing Materials (ACMs).** Given the date of construction of the buildings at the site, it is possible that ACMs are present in building materials. A formal asbestos survey reportedly

has been conducted at the facility, however Ramboll was not provided with a copy of the report. Ramboll conducted visual observations of limited areas of the buildings at the site and noted PACMs (e.g., vinyl floor tile, pipe insulation) and other materials that may contain asbestos (e.g., ceiling tiles, roofing materials). The PACMs and suspect ACMs that were observed by Ramboll did not appear to be extensively damaged, broken, or deteriorated. Facility personnel indicated an ACM survey was recently conducted at the site, however Ramboll was not provided with a copy of the report.

- **Water Intrusion/Mold.** Ramboll did not perform a mold survey at the site; however, facility personnel provided information regarding past water intrusion events. According to facility personnel, only minor roof leaks have occurred, and roof leaks were addressed by third-party contractors. Facility personnel also indicated that there have not been any problems with mold in the past.
- **Lead-Based Paint.** Lead was a major ingredient in paint pigment prior to and through the 1940s. While other pigments were used in the 1950s, the use of lead in paint continued until the early 1970s. In 1978, the Consumer Products Safety Commission banned paint and other surfacing coating materials that are "lead-containing paint." Based on the construction date of on-site buildings dating back to approximately 1950, it is possible that lead-based paint was used historically on facility structures. Facility personnel knew of no lead-based paint on structures at the facility. Ramboll observed the paint to be in good condition. According to facility personnel, a LBP survey was conducted at the site (but no report was available at the time of this report).
- **Radon.** Based on information included in the environmental database report, the site is located in an area categorized as Zone 2, which has average indoor radon levels between 2 and 4 pCi/L. The USEPA's continuous exposure limit, which is the limit at which further testing or remedial action is suggested, is 4.0 pCi/L. This USEPA continuous exposure limit applies to residential, not commercial, properties. According to the California Radon database, for 8 sites surveyed in the 90701 zip code, no sites had radon present at greater than 4.0 pCi/L. A USEPA survey conducted in the same zip code as the site found that the average radon level of a first-floor room at one site was 0.000 pCi/L. Radon appears unlikely to represent an environmental concern to the site and Ramboll recommends no further investigation regarding this issue.

## 7.5 Analysis of Data Gaps

The ASTM Standard defines a data gap as "a lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information." A data gap is only significant if other information obtained during the ESA, or professional experience, raises reasonable concerns and affects the ability of the environmental professional to identify whether a given issue is a REC. The ASTM Standard requires that the ESA report identify and comment on significant data gaps.

Limiting conditions and deviations to the ASTM Standard for the assessment are discussed below.

- Facility personnel did not have current contact information for representatives of former site owners/occupants. Thus, Ramboll was unable to interview former owners/occupants about historical operations and site conditions. However, Ramboll conducted interviews with representatives of California Dairies Inc. with tenure at the site dating back to 1980 and reviewed other historical sources regarding former uses of the site.
- During the site visit, Ramboll did not observe the roofs of the buildings due to access and safety constraints.

- As it is a user requirement, Ramboll did not conduct a review of records to identify whether any environmental liens or AULs have been imposed on the site.
- Between 1987 and 1997 four USTs were removed from the site. During the removal, a subsurface release of gasoline was reported which impacted groundwater. The site received closure in 1997, however copies of these records have not yet been received by Ramboll from the Fire Department.
- Ramboll has requested site-related information, but not yet received a response, from the City of Artesia Building and Safety Department or the County of Los Angeles Fire Department.

None of the exceptions, deletions, deviations, or site reconnaissance limitations noted above are considered to represent significant data gaps. The previous LUST site investigation reports that were not available for Ramboll's review would have represented a significant data gap – but for the Phase II subsurface investigation data generated by Ramboll and discussed herein (therefore, based on the Phase II subsurface investigation data, the lack of LUST-related reports does not represent a significant data gap).

## 8. ASTM DEFINITIONS

The following definitions are presented in the ASTM Standard:

### **REC - Recognized Environmental Condition:**

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

### **CREC - Controlled Recognized Environmental Condition:**

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

### **HREC - Historical Recognized Environmental Condition:**

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

### ***De minimis* Condition:**

A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

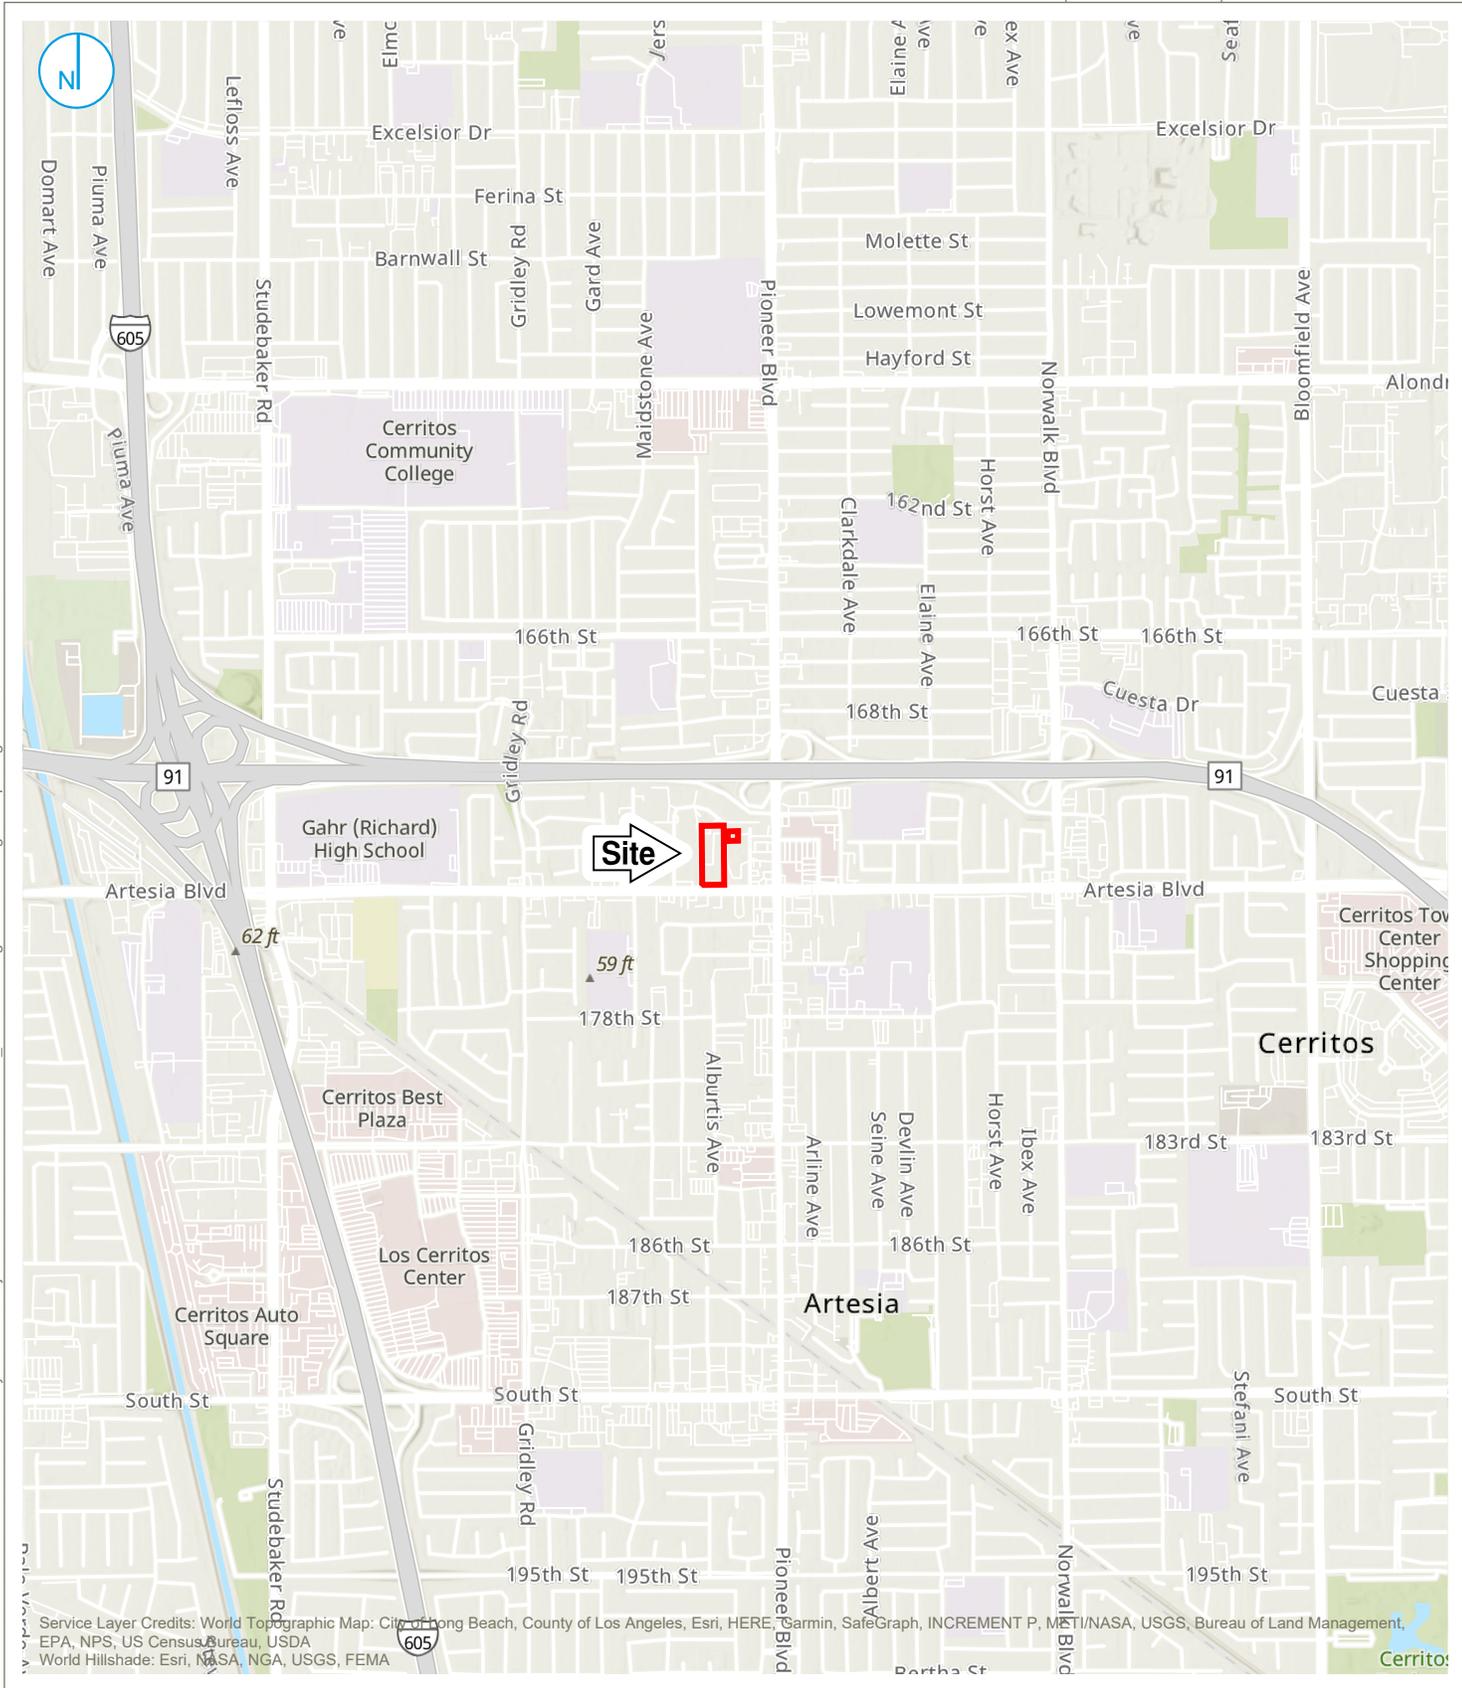

### **Data Gap / Significant Data Gap:**

A lack of or inability to obtain information required by the practice despite good faith efforts by the environmental professional to gather such information. A data gap is significant if other information and/or professional experience raises concerns involving the data gap.

*Please note that the term "other finding" is not defined by ASTM; rather, Ramboll uses the term to connote areas of contingent risk that are not clearly defined by the ASTM Standard.*

SITE PHOTOGRAPHS**

Photo 1: View of 50,000-gallon waste water tank looking west.

Photo 2: View USDA Certified lab and product testing area.

Photo 3: View of a portion of the silo room area.

Photo 4: View of one of the sump pumps located in the main office area.

Photo 5: Typical example of caustic and acid chemical storage used to sanitize silos.

Photo 6: View of former hazardous chemical storage cabinet in the maintenance room.

Photo 7: View of the wastewater tanks, truck scale, and portions of the former glycol system looking north.

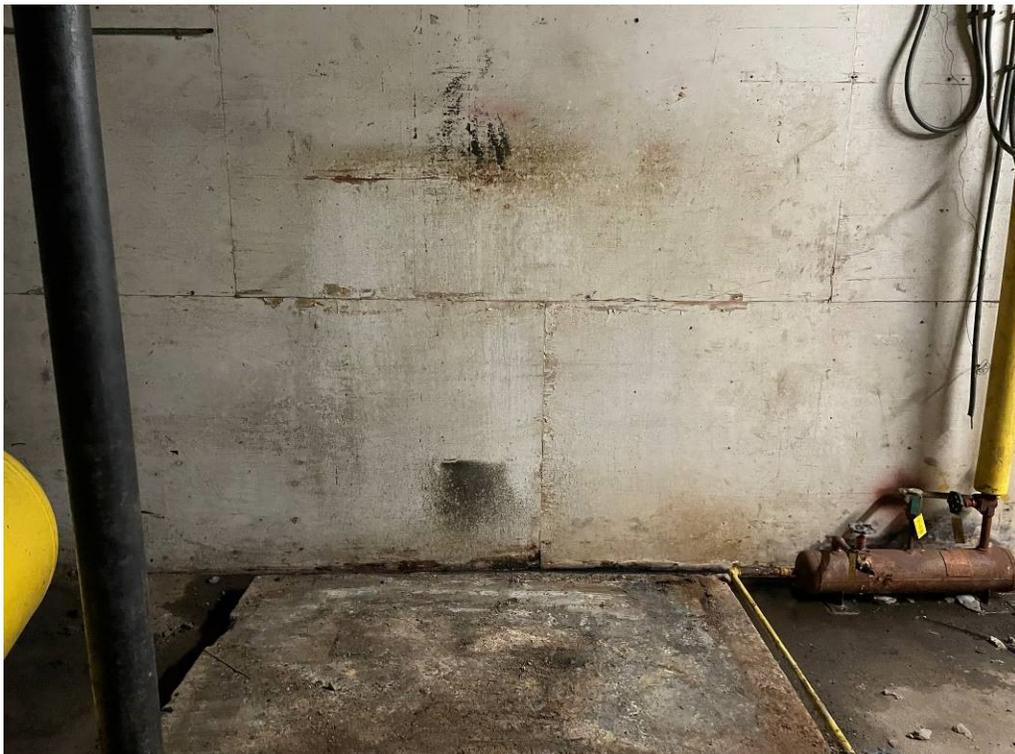

Photo 8: View of the former glycol storage area in the Ammonia Room.

Photo 9: View of AST former chemical storage area used to treat the wastewater pH.

Photo 10: Photo of the hydraulic oil elevator room with minor staining.

Photo 11: One of two on-site natural gas boilers located in the boiler area.

Photo 12: View of the former hazardous waste and chemical storage area and waste oil AST looking southwest.

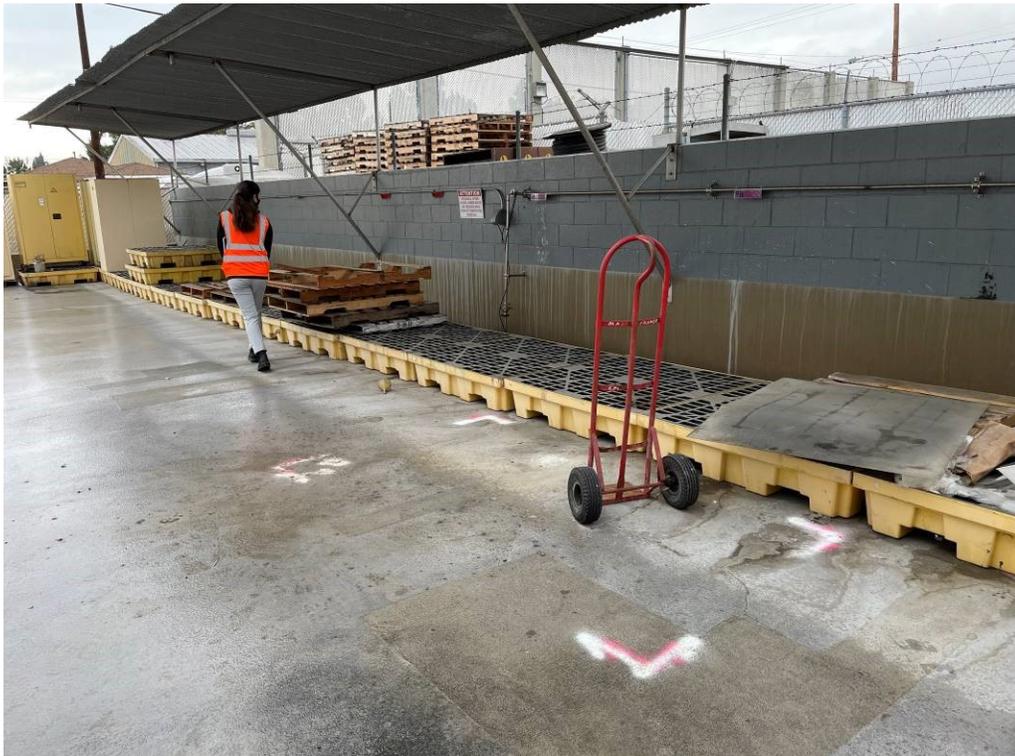

Photo 13: View of the former hazardous waste and chemical storage area looking northwest.

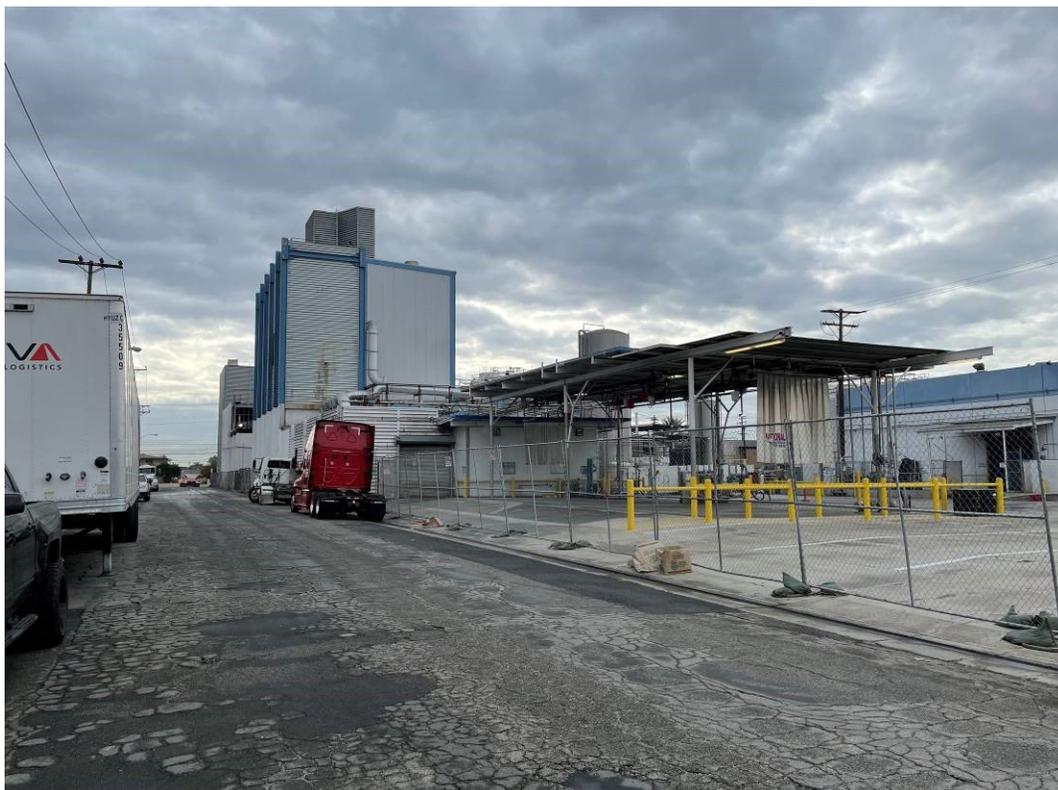

Photo 14: View of the site including truck wash area, the De Laval Dryer, and truck parking looking southwest.

Photo 15: View of the parking lot across Alburdis Street looking southeast.

Photo 16: View of the main sewer drain connection, product silos, cooling towers and the eastern portion of the site looking east.

Photo 17: View of the center and southern portions of the site looking south including transformers, a portion of the boiler area, the raw-milk silos and the tanker truck exit.

Photo 18: View of empty water treatment chemicals formerly located in the boiler room.

## **APPENDIX B ENVIRONMENTAL DATABASE REPORT**

### **NOTES ON ENVIRONMENTAL DATABASE REPORT**

EDR conducted its searches for the standard environmental record sources and the minimum search distances, as specified by the ASTM Standard. The ASTM Standard uses the terminology “approximate minimum search distance” to refer to the radii searched in the environmental database report.

EDR conducted the search of environmental databases in December 2021. Because the environmental databases themselves are sometimes not updated by the specific regulatory agencies for periods of up to one year or more (depending on the database and the state), the database search conducted herein will not necessarily list any facility or site for which an environmental investigation/listing has been initiated subsequent to the last update.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

### **Lists of state and tribal leaking storage tanks**

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 25 LUST sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 SWEEPS UST sites within approximately 0.25 miles of the target property.

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 42 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 10 EDR Hist Auto sites within approximately 0.25 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.25 miles of the target property.

**Environmental Interest/Information System:**

AIR EMISSIONS CLASSIFICATION UNKNOWN  
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.  
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.  
STATE MASTER  
US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

**1000853746**

City: ARTESIA  
Facility ID: Los Angeles River 192454001  
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CA0057371 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 4  
Facility Telephone: 5628651291  
Facility Contact: Randy Ellis  
Agency Name: CALIFORNIA DAIRIES INC.  
Agency Address: Not reported  
Agency City,St,Zip: 0  
Agency Contact: Not reported  
Agency Telephone: Not reported  
Agency Type: Private  
SIC Code: 2023  
SIC Code 2: Not reported  
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
Primary Waste: MISCEL  
Waste Type2: D  
Waste2: Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type)  
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
Secondary Waste: Process Waste (Waste produced as part of the industrial/manufacturing process)  
Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**Violations:**

Site ID: 437836  
Site Name: SOCAL DIESEL REPAIR, LLC  
Violation Date: 12-11-2020  
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12  
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.  
Violation Notes: Returned to compliance on 12/23/2020. OBSERVATION: Current owner generates used motor oil, waste antifreeze, used oil and fuel filters in the facility and does not have an Environmental Protection Agency (EPA) Identification (ID) noted in the DTSC database. DTSC Form 1358 provided and emailed to owner/operator. CORRECTIVE ACTION: A hazardous waste generator shall not treat, store, dispose of, transport or offer

Violation Program: HW  
Violation Source: CERS

Site ID: 437836  
Site Name: SOCAL DIESEL REPAIR, LLC  
Violation Date: 03-26-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 05/30/2019. Observed a 30 gallon drum containing waste paint solvent with a blank hazardous waste label. CORRECTIVE ACTION: All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Fill in the required information on the label and affix to the drum. Provide photo to CUPA via email.

Violation Date: 03-26-2019  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Violation Notes: Returned to compliance on 12/11/2020. OBSERVATION: Observed a 30 gallon drum containing waste paint solvent without an accumulation date. Operator did not have a copy of the most current manifest at the time of inspection. CORRECTIVE ACTION: Immediately label these containers and ensure that all containers are marked with all the required information. All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Since it cannot be determined how long the containers of waste paint solvent have been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste and submit a copy of the manifest to the CUPA by 4/25/2019.

Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.

Violation Notes: Returned to compliance on 05/30/2019. OBSERVATION: Uniform Hazardous Waste Manifests for waste paint solvent and receipt/documentation for paint booth filter disposal was not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests/bill of lading/receipt for waste paint solvent and submit copies to the CUPA by 4/25/2019

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 07/12/2014. OBSERVATION: 4x55 gallons dums. All hazardous waste containers shall be marked with the following information: 1) the words G Hazardous WasteG ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all containers are marked with all the required information. Since it cannot be determined how long the [describe containers lacking accumulation start date] have [or has been] been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA by [06/20/14].

Citation: HSC 6.5 25201.16(e) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.16(e)

Violation Description: Failure of the universal waste handler to manage universal waste aerosol cans in a manner that prevents fire, explosion, and the unauthorized release of any universal waste or component of a universal waste to the environment.

Violation Notes: Returned to compliance on 10/01/2020. OBSERVATION: Owner/Operator failed to manage universal waste aerosol cans in a manner that prevents fire, explosion, and the unauthorized release of any universal waste or component of a universal waste to the environment. At the time of inspection, observed 3 non-empty aerosol spray cans in the shop storage area and 2 non-empty aerosol spray cans in the paint booth. Conversation with employee and operator stated they do not put the aerosol spray cans in the trash but they were not able to show

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Citation: HSC 6.95 25503.5(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25503.5(a)

Violation Description: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.

Violation Notes: Returned to compliance on 07/21/2018. OBSERVATION: Owner/Operator failed to establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet. CORRECTIVE ACTION: Establish and implement a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.

Violation Division: Los Angeles County Fire Department

Violation Program: HMRRP

Violation Source: CERS

Site ID: 101471

Site Name: CAL PLATE INC

Violation Date: 06-21-2018

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 06/21/2018. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Six 55 gallon drums containing waste heptyl acetate solids located across from the PRI machine was observed without labels. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Operator, Juan, affixed the yellow Haz Waste labels at the time of inspection. This item was corrected on site.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Violations:**

Site ID: 104297  
Site Name: CERRITOS AUTO BODY  
Violation Date: 11-13-2017  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/13/2017. OBSERVATION: Observed one 55-gallon used oil and one 55-gallon waste antifreeze with faded and incomplete labels. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Operator re-labeled the containers at the time of inspection.

Violation Program: HW  
Violation Source: CERS

Site ID: 104297  
Site Name: CERRITOS AUTO BODY  
Violation Date: 10-21-2014  
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)

Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 01/15/2015. OBSERVATION: A business plan has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan by 11/20/2014]. CORRECTIVE ACTION: Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.

Site Name: CERRITOS AUTO BODY  
Violation Date: 11-13-2017  
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173  
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.  
Violation Notes: Returned to compliance on 01/17/2018. OBSERVATION: One 55-gallon used oil and one 55-gallon waste antifreeze were observed open. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container

listed above has been properly closed.  
Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS

Site ID: 104297  
Site Name: CERRITOS AUTO BODY  
Violation Date: 11-13-2017  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.  
Violation Notes: Returned to compliance on 11/13/2017. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. Operator completed the annual certification at the time of inspection.

Violation Program: HMRRP  
Violation Source: CERS

Site ID: 104297  
Site Name: CERRITOS AUTO BODY  
Violation Date: 11-13-2017  
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12  
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.  
Violation Notes: Returned to compliance on 11/13/2017. OBSERVATION: The generator's EPA ID number (CAL000284807) is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID number. Operator completed the application for re-activating the facility's EPA ID at the time of inspection.

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

accumulation start date. If the accumulation date can be determined, affix the required markings and provide a photo to CUPA inspector via email demonstrating that the containers listed above have been properly labeled. However, if the accumulation date cannot be determined, properly dispose of the hazardous wastes listed above and provide a copy of the manifest via email to CUPA Inspector. Complete and electronically submit the Certification of Compliance to CUPA Inspector via email

Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS

Site ID: 572143  
Site Name: ELITE CONSTRUCTION EQUIPMENT  
Violation Date: 01-14-2021  
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507

Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 02/17/2021. OBSERVATION: An owner/operator is required to establish and implement a Hazardous Materials Business Plan (HMBP) for storing hazardous materials/wastes at or above the threshold quantities of 55 gallons of liquid/500 pound of solids/200 cubic feet of gas. The following were observed at the time of inspection: Two 55 gallon drums used to store used motor oil Three 55 gallon drums containing new motor oil One 55 gallon drum containing new coolant One 125 gallon (4,550 cubic feet) of propane CORRECTIVE ACTIONS: Establish and implement your HMBP; submit your HMBP via California Environmental Reporting System (CERS) <http://cers.calepa.ca.gov/>. Complete and submit the Certification of Compliance to CUPA inspector.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility Type: 01  
Facility Status: Closed  
Area: 1D  
Permit Number: 000394865  
Permit Status: Closed

**WDS:**

Name: BIG PENNY CARWASH  
Address: 17509 Pioneer Blvd  
City: ARTESIA  
Facility ID: Los Angeles River 197200012  
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: Not reported  
Subregion: 4  
Facility Telephone: 5628605616  
Facility Contact: Ron Workman  
Agency Name: BIG PENNY CAR WASH  
Agency Address: Not reported  
Agency City,St,Zip: 0  
Agency Contact: Not reported  
Agency Telephone: Not reported  
Agency Type: Private  
SIC Code: 0  
SIC Code 2: Not reported  
Primary Waste Type: Not reported  
Primary Waste: Not reported  
Waste Type2: Not reported  
Waste2: Not reported  
Primary Waste Type: Not reported  
Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: No reclamation requirements associated with this facility.  
POTW: The facility is not a POTW.  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)  
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.  
Violation Notes: Returned to compliance on 04/30/2019. OBSERVATION: Uniform Hazardous Waste Manifests for used motor oil and waste antifreeze were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for used motor oil and waste antifreeze. Submit the Certification of Compliance and/or any supporting documentation/photo to CUPA by 5/5/2019

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Violation Notes: Returned to compliance on 05/03/2019. OBSERVATION: Observed the following: a) 1 x 55 gallon drum containing used oil with accumulation date 11/13/2017 b) 1 x 55 gallon drum containing waste antifreeze with no accumulation date noted c) 1 x 55 gallon drum containing waste paint solvent with accumulation date 8/28/2018 CORRECTIVE ACTION:

Immediately contact a licensed hazardous waste hauler to dispose of this waste and submit the Certification of Compliance and/or any supporting documentation/photo to CUPA by 5/5/2019

Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS

Site ID: 163678  
Site Name: TRUK PROS INC  
Violation Date: 04-05-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 05/03/2019. OBSERVATION: Observed a poly drum with unknown contents without the required markings. CORRECTIVE ACTION: Immediately label the poly drum and ensure that all containers are marked with all the required information. All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Since it cannot be determined how long drum have been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste and submit the Certification of Compliance and/or any supporting documentation/photo to CUPA by 5/5/2019

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.

Violation Notes: Returned to compliance on 02/02/2016. OBSERVATION: Copies of hazardous waste disposal records for waste paint booth filters and waste coolant for 2015, 2014 and 2013 were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 1/17/16.

Violation Description: Chapter 12, Section(s) 66262.34(d)  
Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.

Violation Notes: Returned to compliance on 01/14/2016. OBSERVATION: Observed one each of 55-gallon used oil, waste coolant and waste paint solvent accumulating for more than 180 days . Facilities who generate less than 1000 kg of hazardous waste per month and do not exceed 6000 kg of waste stored on site at any time may store waste on site up to 180 days. CORRECTIVE ACTION: Immediately contact a licensed hazardous waste hauler to dispose of this waste under manifest and submit a copy of the manifest to the CUPA by 1/17/16.

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 04/05/2019. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. CERS review revealed last submittal dated 7/31/2018. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. Owner submitted completed HMBP at the time of inspection. This item is corrected.

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 01/14/2016. OBSERVATION: Observed the top of the used oil and waste coolant 55-gallon drums accumulated with used oil and waste antifreeze. Facilities shall be maintained and operated to minimize the possibility of a fire, explosion, or release of hazardous waste to air, soil, or surface water which could threaten human health or the environment. CORRECTIVE ACTION: Immediately clean the waste accumulation on top of the drums and manage according to Title 22 hazardous waste regulations. Submit a statement and supporting documentation explaining how this waste was managed by 1/17/16.

Hazardous Waste Summary:

Waste Code: D001  
 Waste Description: IGNITABLE WASTE

Waste Code: F003  
 Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005  
 Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U058  
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U129  
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U150  
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U165  
Waste Description: NAPHTHALENE

Waste Code: U188  
Waste Description: PHENOL

Waste Code: U205  
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

of lading/receipts, etc) for the waste hydrocarbon was not available at the time of facility visit. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three (3) years and have them readily available for review. **CORRECTIVE ACTION:** Locate the copies of the hazardous waste disposal records (manifest/bill of lading/receipts, etc) for the last 3 years and send a copy via email to CUPA inspector. Complete then submit the Certification of Compliance via email to CUPA inspector on or before the compliance date

Violation Division: Los Angeles County Fire Department  
Violation Program: HW  
Violation Source: CERS

Site ID: 93526  
Site Name: ARTESIA CENTER CLEANERS  
Violation Date: 10-21-2014  
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)

Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 02/20/2016. **OBSERVATION:** A business plan has not been received by the CUPA. The facility was previously sent a notice/request from the CUPA for the submittal of a business plan by 11/21/2014 **CORRECTIVE ACTION:** Submit the business plan electronically in the California Environmental Reporting System (CERS) and implement immediately.

Violation Division: Los Angeles County Fire Department  
Violation Program: HMRRP  
Violation Source: CERS

Site ID: 93526  
Site Name: ARTESIA CENTER CLEANERS  
Violation Date: 01-02-2018  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 02/02/2018. **OBSERVATION:** A 55 gallon blue drum indicating it contained waste hydrocarbons was observed without an accumulation start date and a manifest/receipt demonstrating disposal within the past 180 days was not available. The last documented hazwaste disposal was dated 4/27/2016. **CORRECTIVE ACTION:** Since it cannot be determined how long the drum of waste hydrocarbon have been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste and submit a copy of the manifest to the CUPA by 2/1/2018. Provide a copy of the manifest via email.

Site ID: 153220  
Site Name: SHIL PARK PAINT  
Violation Date: 07-17-2018  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 08/14/2018. OBSERVATION: All hazardous waste containers shall be marked with the following information: 1) the words "Hazardous Waste"; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. Observed more than ten 1-gallon containers, 5-gallon containers, and quart sized containers either without labels or unreadable label stored outside of the building on the north side of the property. Operator stated that most of the containers were dropped off at their location by public without them knowing about it, other containers appears to be empty. Three paint care bins were available on site. One of the three bins was not full. Operator will contact a licensed hazardous waste hauler to properly dispose of the containers. CORRECTIVE ACTION: Since it cannot be determined how long the containers have been on site, immediately contact a licensed hazardous waste hauler to dispose of this waste and submit a copy [Truncated]

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: Stater Bros. Markets 161  
Violation Date: 11-06-2017  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
Violation Notes: Returned to compliance on 11/08/2017. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. Observed 1,336 cubic feet (552 lbs.) of R-404A refrigerant not included in the CERS inventory. The "max daily amount" reported for R-407C in CERS is incorrect. Observed 3,876 cubic feet of R-407C (325 lbs., 650 lbs., 625 lbs.). CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.

CERS:

Name: 99 RANCH MARKET #17  
Address: 17713 PIONEER BLVD.  
City,State,Zip: ARTESIA, CA 90701  
Site ID: 1868  
CERS ID: 10514089  
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 1868  
Site Name: 99 Ranch Market #17  
Violation Date: 11-20-2015  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
Violation Notes: Returned to compliance on 12/08/2015. OBSERVATION: The amount of propane (liquefied petroleum gas) reported is incorrect. Amount reported in CERS is 38.8 cubic feet. Observed 4 cylinders of propane with a total of 32 gallons of propane. Please report propane in gallon. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in the California Environmental Reporting System (CERS).  
Violation Division: Los Angeles County Fire Department  
Violation Program: HMRRP  
Violation Source: CERS

Site ID: 1868  
Site Name: 99 Ranch Market #17  
Violation Date: 04-01-2019  
Citation: 49 CFR 1 172 - U.S. Code of Federal Regulations, Title 49, Chapter 1, Section(s) 172

Violation Description: Failure of the universal waste handler to transfer universal waste to another universal waste handler, or appropriate destination facility. Failure to package, label, mark and placard shipments and prepare shipping papers for any universal waste that meets the hazardous materials definition in accordance with DOT 49 CFR parts 171-180.

Violation Notes: Returned to compliance on 04/16/2019. OBSERVATION: Universal Waste Handler (UWH) failed to properly package, label, mark, placard, or prepare and retain shipping papers for all universal waste being shipped to another universal waste handler, destination facility, or foreign facility. At the time of field visit, operator unable to show proof of proper disposal of the used fluorescent light bulbs. CORRECTIVE ACTION: Submit statement of compliance and/or a photo of the waste labeled properly to CUPA demonstrating that all universal waste noted above have been properly packaged, labeled, marked, placarded, or prepared and retain shipping papers.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### *Lists of Federal NPL (Superfund) sites*

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 12/01/2021
Number of Days to Update: 24	Next Scheduled EDR Contact: 01/10/2022
	Data Release Frequency: Quarterly

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: N/A
Date Made Active in Reports: 11/29/2021	Last EDR Contact: 12/01/2021
Number of Days to Update: 24	Next Scheduled EDR Contact: 01/10/2022
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 05/25/2021  
Date Data Arrived at EDR: 06/24/2021  
Date Made Active in Reports: 09/20/2021

Last EDR Contact: 10/01/2021  
Next Scheduled EDR Contact: 01/10/2022  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/20/2021

Next Scheduled EDR Contact: 01/24/2022  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/20/2021	Source: EPA
Date Data Arrived at EDR: 11/05/2021	Telephone: 800-424-9346

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2022
	Data Release Frequency: Quarterly

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021

	Data Release Frequency: Quarterly

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2022
	Data Release Frequency: Quarterly

### RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/15/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 10/12/2021	Last EDR Contact: 09/15/2021
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2022
	Data Release Frequency: Quarterly

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 07/12/2021	Source: Department of the Navy
Date Data Arrived at EDR: 08/06/2021	Telephone: 843-820-7326
Date Made Active in Reports: 10/22/2021	Last EDR Contact: 11/08/2021
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/21/2022
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 11/12/2021	Last EDR Contact: 11/18/2021
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/06/2022
	Data Release Frequency: Varies

#### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/23/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/23/2021	Telephone: 703-603-0695
Date Made Active in Reports: 11/12/2021	Last EDR Contact: 11/19/2021
Number of Days to Update: 81	Next Scheduled EDR Contact: 03/07/2022
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/14/2021

Date Data Arrived at EDR: 06/17/2021

Date Made Active in Reports: 08/17/2021

Number of Days to Update: 61

Next Scheduled EDR Contact: 02/07/2022

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/22/2021

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 05/18/2021	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 05/18/2021	Telephone: 202-307-1000
Date Made Active in Reports: 08/03/2021	Last EDR Contact: 11/16/2021
Number of Days to Update: 77	Next Scheduled EDR Contact: 03/07/2022
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/22/2021	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 07/22/2021	Telephone: 916-323-3400
Date Made Active in Reports: 10/08/2021	Last EDR Contact: 10/26/2021
Number of Days to Update: 78	Next Scheduled EDR Contact: 02/07/2022
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/20/2021	Telephone: 916-255-6504
Date Made Active in Reports: 04/08/2021	Last EDR Contact: 11/11/2021
Number of Days to Update: 78	Next Scheduled EDR Contact: 01/17/2022
	Data Release Frequency: Varies

### CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 07/15/2021	Source: CalEPA
Date Data Arrived at EDR: 07/15/2021	Telephone: 916-323-2514
Date Made Active in Reports: 10/06/2021	Last EDR Contact: 10/19/2021
Number of Days to Update: 83	Next Scheduled EDR Contact: 01/31/2022
	Data Release Frequency: Quarterly

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 07/01/1995  
Date Data Arrived at EDR: 08/30/1995

Data Release Frequency: No Update Planned

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2021  
Date Data Arrived at EDR: 05/18/2021

Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/30/2021	Source: DTSC and SWRCB
Date Data Arrived at EDR: 08/31/2021	Telephone: 916-323-3400

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/13/2021	Source: Environmental Protection Agency

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014  
Date Made Active in Reports: 06/17/2014

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## **EDR HIGH RISK HISTORICAL RECORDS**

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2018	Source: Department of Environmental Protection
Date Data Arrived at EDR: 04/10/2019	Telephone: N/A
Date Made Active in Reports: 05/16/2019	Last EDR Contact: 10/05/2021
Number of Days to Update: 36	Next Scheduled EDR Contact: 01/17/2022
	Data Release Frequency: Annually

NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 01/01/2019	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 04/29/2020	Telephone: 518-402-8651
Date Made Active in Reports: 07/10/2020	Last EDR Contact: 10/29/2021
Number of Days to Update: 72	Next Scheduled EDR Contact: 02/07/2022
	Data Release Frequency: Quarterly

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

## Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

North Map:	11997982 WHITTIER, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

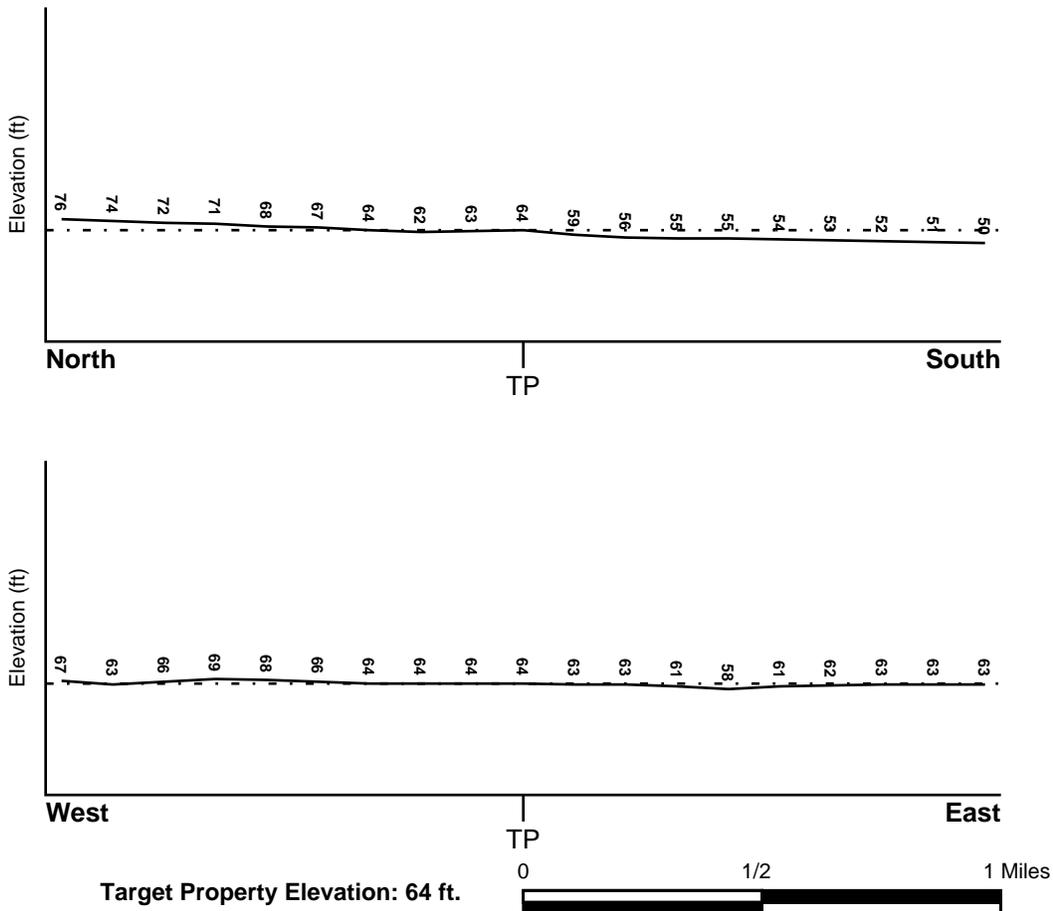

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1980F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1840F	FEMA FIRM Flood data
06037C1839F	FEMA FIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LOS ALAMITOS	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

## GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam  
 clay  
 silt loam  
 loamy sand  
 sandy loam  
 fine sand  
 clay loam  
 gravelly - sandy loam  
 coarse sand  
 gravelly - sand  
 sand

Surficial Soil Types: loam  
 clay  
 silt loam  
 loamy sand  
 sandy loam  
 fine sand  
 clay loam  
 gravelly - sandy loam  
 coarse sand  
 gravelly - sand  
 sand

Shallow Soil Types: fine sandy loam  
 gravelly - loam  
 sand  
 silty clay

Deeper Soil Types: stratified  
 clay loam  
 silty clay loam  
 gravelly - sandy loam  
 coarse sand  
 sand  
 weathered bedrock  
 very fine sandy loam

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Contact: Cara Thomann

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Certified Sanborn Results:

**Project** 1690009964 Borstein

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 0239-4512-AF17

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Ramboll (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

**Notes:**

µg/l - micrograms per liter

<X - value not reported above the laboratory reporting limit

-- - not analyzed

Data is presented in µg/l units

*Duplicate sample is italicized*

J - Analyte concentration detected between Reporting Limit (RL) and Method Detection Limit (MDL)

Soil vapor samples were analyzed for VOCs by USEPA Method 8260B.

**Only compounds reported above the laboratory reporting limit are shown**

VOCs - Volatile Organic Compounds

Indicates compounds exceed soil gas residential scenario screening levels using a 0.001 AF, and less stringent screening levels.

Indicates compounds exceed soil gas commercial building scenario screening levels using a 0.03 AF, and less stringent screening levels.

Indicates compounds exceed soil gas residential building scenario screening levels using a 0.03 AF.

B3	2	11/2/2021	<b>0.13</b>	<5.1	<5.1	<b>7.7</b>
	4	11/2/2021	<b>0.23</b>	<4.9	<b>4.9</b>	<b>8.1</b>
	6	11/2/2021	<b>0.76</b>	<4.8	<4.8	<b>8.2</b>

Notes:

bgs = below ground surface

DRO = diesel range organics

GRO = gasoline range organics

mg/kg = milligrams per kilogram

NA = Sample not analyzed for this compound

NE = Not established

ORO = oil range organics

TPH = total petroleum hydrocarbons

USEPA = United States Environmental Protection Agency

Soil samples were analyzed for TPH by USEPA Method 8015M and selectively for pH.

Results and screening levels for TPH are reported in milligrams per kilogram (mg/kg).

pH are reported in standard units.

## Qualifiers

### GC VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.

### GC Semi VOA

Qualifier	Qualifier Description
*1	LCS/LCSD RPD exceeds control limits.

## Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
▫	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

# Case Narrative

Client: Ramboll US Corporation

**Laboratory: Eurofins Calscience LLC**

## Narrative

### Job Narrative 570-74585-1

#### Comments

No additional comments.

#### Receipt

The samples were received on 11/2/2021 3:35 PM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 5.0° C.

#### HPLC/IC

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### GC VOA

Method 8015B: The matrix spike duplicate (MSD) recoveries of Gasoline Range Organics (C4-C13) for preparation batch 570-191858 and analytical batch 570-191842 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### GC Semi VOA

Method 8015B: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 570-191634 and analytical batch 570-191771 recovered outside control limits for the following analytes: C10-C28 Laboratory control sample / laboratory control sample duplicate (LCS/LCSD) percent recovery is in control for affected analytes.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

#### General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

#### VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is <math>\leq</math> background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

### QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.  
B1 = BOD dilution water is over specifications . The reported result may be biased high.  
D = Surrogate recoveries are not calculated due to sample dilution.  
E = Estimated value; Value exceeds calibration level of instrument.  
H = Analyte was prepared and/or analyzed outside of the analytical method holding time  
I = Matrix Interference.  
J = Analyte concentration detected between RL and MDL.  
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.  
S = Customer provided specification limit exceeded.

### ABBREVIATIONS

DF = Dilution Factor  
RL = Reporting Limit, Adjusted by DF  
MDL = Method Detection Limit, Adjusted by DF  
Qual = Qualifier  
Tech = Technician

## **APPENDIX F QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS**

# LEO REBELE

## Principal

Mr. Rebele is a Principal in the Irvine office of Ramboll, with responsibilities that include business development, client liaison, senior oversight and execution on projects involving environmental site investigation, litigation, remediation, environmental permitting and natural resource management. Experience includes the following:

- Supported private industry for more than 25 years by delivering solutions to problems involving real estate due diligence, waterfront and brownfield redevelopment, transit-oriented development, and ports/harbors and watershed-related services. Project experience has been split between managing uplands projects focusing on property transfer/redevelopment and assisting private and port clients with aquatic-related environmental issues.
- Provided high-level strategic redevelopment consulting services to municipalities and private developers in connection with the transfer and redevelopment of contaminated real estate. Clients include residential, commercial and industrial developers, land owners, attorneys, and real estate brokers. Implementing cost recovery actions by providing environmental litigation support services; designing and implementing environmental liability transfer programs including guaranteed fixed-price remediation (GFPR) contracts.
- Provided environmental litigation support services in matters involving cost recovery actions against responsible parties. Deposition and trial experience including a landmark litigation case 3000 E. Imperial v. Robertshaw Controls et al. Routinely conducts environmental forensics analyses with a specialty in compound-specific isotope analysis (CSIA). Develops and applies multi-media video and animation for purposes of trial exhibits and mediation settlement discussions.
- Managed and supervised dozens of Phase I and II environmental site assessments (ESAs) and remediation projects throughout the western United States, Canada, and Mexico; assessed sites affected by landfill materials, chlorinated solvents, heavy metals, petroleum hydrocarbons (including free product), polychlorinated biphenyls (PCBs), and strong acids; prepared site conceptual models; performed remedial investigation/feasibility studies (RI/FSs); managed the completion of human health risk assessments; and evaluated remedial action alternatives under the Comprehensive

## CONTACT INFORMATION

Leo Rebele

Ramboll  
5 Park Plaza  
Suite 5  
Irvine, 92614  
United States of America

Environmental Response, Compensation, and Liability Act (CERCLA) and ensuring compliance with the National Contingency Plan (NCP). Regulatory negotiation/site closure experience with various jurisdictional offices of the Regional Water Quality Control Board (CRWQCB) and the California Department of Toxic Substances Control (DTSC), Orange County (California) Health Care Agency, the City and County Fire Departments of Los Angeles and the San Diego County of Environmental Health.

- Managed and provided oversight for projects involving natural resource management issues, including wetland evaluations and permitting, marine benthological studies, sediment and water quality monitoring, and underwater and eelgrass surveys. Experience has also included developing public outreach materials on behalf of private-sector clients, conducting resource mapping using Global Positioning System (GPS) software and geographic information system (GIS) technology.
- Served as program manager for several environmental impact assessments under National Environmental Policy Act (NEPA) and California Environmental Quality Act. Projects include environmental assessments (EAs) for proposed telecommunication sites on federal land, municipal well installations, private urban infill developments and mega-scale solar facilities located in Los Angeles County and San Bernardino County.

## EDUCATION

1997

**MS, Marine Resource Management (Minor, Aquatic Toxicology)**

Oregon State University

1994

**BS, Biological Oceanography (Honors)**

University of British Columbia

## PROJECTS

2016-2017

### **Environmental Oversight**

Mr. Rebele served as the principal-in-charge for the environmental oversight of a sewer line replacement in an area where groundwater impacted by chlorinated volatile organic compounds (cVOCs) associated with a State Superfund site may be encountered by city workers. The scope of work involves navigating concerns of a contentious community group and ensuring the protection of City workers through the development and implementation of a field monitoring program during sewer line construction activities.

2017

### **Due Diligence and Environmental Compliance Review**

Mr. Rebele lead a due diligence and environmental compliance team in support of an acquisition of a 700-acre terminal in the Port of Los Angeles. The work involved a comprehensive assessment of current practices involving the use, storage and disposal of hazardous materials, compliance with air and stormwater regulations, and a review of historical spills and cleanup activities. A Phase I Environmental Site Assessment was conducted as part of the review. A review of California Environmental Quality Act (CEQA) permitting issues was also performed to evaluate the potential for terminal expansion onto an unoccupied portion of the facility.

2017-present

**Pilot Testing and Support of Guaranteed Fixed Price Remediation Program**

Mr. Rebele is heading a comprehensive site investigation and pilot test to evaluate a proposed groundwater and soil remediation strategy in support of a guaranteed fixed-price remediation (GFPR) strategy. The property, which is being sold to an industrial developer, is impacted by moderated levels of trichloroethylene and perchloroethylene in groundwater, with impacts extending off-site. Concentrations of chlorinated VOCs in soil vapor beneath the manufacturing facility were found to be very high, requiring immediate mitigation. Mr. Rebele is leading the project team to develop a groundwater remedy under a possible GFPR contract option while designing soil vapor extraction and vapor mitigation system that can be implemented in the short term.

2016-present

**Implementation of Mitigation Monitoring, New Residential Development**

Mr. Rebele served as principal-in-charge for a project involving implementing mitigation monitoring requirements for biological and cultural resources under California Environmental Quality Act (CEQA). Work included conducting ongoing monitoring for cultural and biological resources during disturbance of native soils during grading for a new residential development. Challenges included working with changing client schedules and interfacing with regulatory personnel to keep the project on-track on-schedule.

2016-present

**Redevelopment of former ITT Site into new Industrial Complex**

Lead consultant for a high-profile industrial redevelopment project in Santa Ana, California. The project involves assisting the prospective developer with the pre-bid due diligence during the seller's auction, evaluating seller's proposed remedial strategy in the context of the proposed development, performing Phase I and II environmental assessments, regulatory agency negotiation, and the design of a vapor mitigation system. Complexities in the due diligence activities include the integration of a polychlorinated biphenyl (PCB) cap into the proposed development and integrating the proposed electrical resistance heating/steam injection remedial program with client's development plans.

2016-2017

**Implementation of Soil Management Plan and Soil Stockpile Profiling for Residential Development Project**

Mr. Rebele served as client services manager for a project involving the redevelopment of a former foundry and iron works facility. The soils beneath the property were identified through a combined Phase I/II Environmental Site Assessment to be impacted with Cal-Hazardous levels of lead. A combination of field screening using a portable X-Ray Fluorescence (XRF) meter and confirmation soil sampling with formal laboratory analysis in order to profile soils to be exported and to establish residual concentrations in soils. Cost effective management of soils was achieved through carefully interfacing with the client's grading contractor and project phasing.

2015-present

**Innovative In-Situ Remediation of Chlorinated Solvents**

Account manager for Griffon Corporation to remediate a chlorinated VOC plume in groundwater which is commingled with chlorinated solvent plumes on adjacent properties. The remediation is confounded by access restrictions associated with a storm channel and two sewer lines. In addition two distinct groundwater mounds resulting from leaks in the sewer lines are affecting the groundwater flow and distribution of the contamination. Mr. Rebele is overseeing the forensic evaluation of sources of VOCs, general strategy, remedial approach and is leading regulatory negotiations.

2015-2017

**In-situ Capping of Heavy Metal Impacted Soils**

For this former tool manufacturing facility (Union Fork and Hoe Company) in upstate New York, Mr. Rebele served as project principal and client service manager. The site, which has been under the

oversight of the New York State Department of Environmental Conservation (NYSDEC) and Department of Environmental Health. Mr. Rebele helped Griffon negotiate a capping remedy of the heavy metals impacted soil. A significant component of the work has been negotiating with NYSDEC and DOH to eliminate a mature wooded area from the remediation area and to reduce the long-term groundwater monitoring obligations.

2005->>>

**Ongoing Brownfield Advisory and Consulting Services**

Serves in a strategic consulting role on behalf of the City for the remediation and brownfield planning of a 170-acre downtown core area targeted for redevelopment. Work to date has included federal and state brownfield grant procurement and execution, brownfield inventory, development of a GIS system, development of an area-wide brownfield remediation strategy, Phase I and II Environmental Site Assessments, development of multiple remedial action plans under the oversight of the Department of Toxic Substances Control, litigation support for cleanup cost recovery, and waste to energy (WTE) consulting.

2007->>>

**Alameda Triangle Redevelopment**

Provided oversight and consulting services for an 11.2 acre project comprised of 5 parcels with multiple ownerships and a history of manufacture use dating to World War II. The property uses identified including a former Witco chemical facility located on Caltrans property, a Magnetek transformer repair and refurbishment business, two auto-wrecking yards, a former railroad right-of-way, and a variety of other uses involving the manufacture and use of various chemical materials. The chemicals detected on-site during Gannett Fleming and other site investigations included organochlorine pesticides, PCBs, free product petroleum hydrocarbons in groundwater and soil, chlorinated VOCs in soil and soil vapor, heavy metals and polynuclear aromatic hydrocarbons. The City is in the process of marketing the site for development. Following a multi-media investigation involving substantial site access coordination, Gannett Fleming prepared a Site Investigation Report, Feasibility Study and a Remedial Action Plan (RAP) for the entire Site. The reports were submitted to Department of Toxic Substances Control (DTSC) for review. Gannett Fleming is working with city's environmental counsel to develop a cost recovery strategy.

2017

**Economic Development Department**

Mr. Rebele is working with the City of South Gate Economic Development Department and their economic development consultant, Rosenow Spivasek Group (RSG,) in addressing environmental impacts associated with a historical gasoline service station. Mr. Rebele and his team were retained to take over all aspects of the assessment and cleanup activities from a prior consultant due to a stalled remedial program.

2015-2016

**Operational Transition/Environmental Compliance**

Project Principal for an operational transition project involving all aspects of environmental compliance as Bombardier took over rail service and maintenance responsibilities for all rail facilities from the prior operators of the North County Transit District (NCTD) facilities at the Escondido and Oceanside yards. Work involved initial consultation, environmental compliance audits, permitting, preparation of spill prevention control and countermeasure (SPCC) plans, stormwater pollution prevention plans (SWPPS) and environmental compliance plans for ongoing rail operations and facility maintenance.

2014->>>

**Remediation of Organochlorine Pesticide Impacted Soils in Support of Residential Development**

Mr. Rebele serves as the principal-in-charge for a residential development project involving the remediation of organochlorine pesticides (OCPs) and closure of historical underground storage tanks

(USTs), irrigation wells and low-level volatile organic compounds (VOCs). In his role, Mr. Rebele is served in a strategic capacity to result in a fast-track review and approval of a remedial action plan by transferring the open case file from a local oversight agency to the Santa Ana Regional Water Quality Control Board.

2014-present

**Remediation of Groundwater at Logistically Constrained Shopping Center**

Mr. Rebele has been serving as principal-in-charge for a complex gasoline remediation project involving very high concentrations of gasoline at a commercial shopping center where site access precludes implementation of many traditional remedies. Mr. Rebele serves as senior technical advisor to the client's environmental counsel and is working to reduce the environmental liabilities of the property owner. Mr. Rebele helped devise a two-part strategy aimed at protecting the current tenants against indoor air intrusion through the development of vapor mitigation systems while conducting an aggressive groundwater remedial program consisting of trenching/product removal followed by in-situ chemical oxidation of groundwater.

2014-present

**Environmental Remediation Consulting in Support of Residential Development**

Mr. Rebele served in a strategic consulting role for New Urban West, Inc. (NUWI) to support the redevelopment of infill properties throughout southern California. Projects have included former nursery/greenhouse areas, manufacturing operations and properties and areas impacted by fill materials. Currently executing several cleanup programs under a California Land Reuse and Revitalization Act (CLRRRA) agreement with the Department of Toxic Substances Control.

2014-2017

**Redevelopment Consulting and Remediation**

Mr. Rebele serves as the project principal for a residential redevelopment project at a former Teledyne research and development facility and historical agricultural operation. Work has involved several phases of soil, soil vapor and groundwater investigation that included multiple degreaser locations, additional potential source areas of metals and petroleum hydrocarbons and organochlorine pesticides associated with the historical agricultural use. A soil vapor extraction (SVE) was implemented to reduce elevated concentrations of PCE to acceptable levels in order to prepare the Site for residential occupancy. The site is currently undergoing redevelopment.

# BRIAN BAUER

## Managing Consultant

Brian Bauer is a California-licensed Professional Geologist and project manager with over ten years of experience in environmental consulting and geology. During his time at Ramboll, he has focused on the characterization and remediation of subsurface contamination in soil, soil vapor, groundwater and has also conducted extensive indoor air evaluations. Brian has designed, managed, and implemented site characterization programs for properties throughout California involving various hazardous substances including heavy metals, VOCs, petroleum hydrocarbons, polychlorinated biphenyls (PCBs) and per- and polyfluorinated alkyl substances (PFAS). He has provided strategic redevelopment consulting services to private developers and also has supported private industry by developing innovative solutions to complex environmental problems. For example, he recently managed a redevelopment project in Southern California that involved an innovative solution consisting of developing site-specific commercial screening levels, coupled with a land use covenant that allowed impacted soils to remain in-place, saving the client several hundred thousand in remediation costs, making it a viable Brownfield redevelopment project. He is also presently involved in conducting a PFAS liability evaluation to assist with a property transaction. He has directed field investigations and implemented remediation programs under the oversight of regulatory agencies including the DTSC, RWQCB and USEPA. Prior to joining Ramboll, he worked as a staff geologist for a Bowyer Environmental Consulting.

## CAREER

2011-2021

**Geologist, RAMBOLL**

2010-2011

**Staff Geologist, Bowyer Environmental Consulting**

## COURSES/CERTIFICATIONS

Professional Geologist, 2016

2010-2012

**Master's Degree in Geology**

CSULB, Long Beach , United States

2008-2010

**Bachelors Degree**

CSULB, Long Beach , United States

**PROJECTS**

2011-2020

**Arrow: Norco Project****Arrow Electronics, Inc., United States**

As part of RI/FS, Ramboll conducted characterization and remediation for a site location in Norco, California. The characterization and remediation consisted of soil, soil vapor, and groundwater subsurface investigations, on-going operation of a hydraulic control system (HCS) and its associated operation and maintenance (O&M), ISCO injection, phytoremediation and its associated O&M, in-situ thermal desorption (ISTD), zero-valent iron (ZVI) injection, and on-going groundwater monitoring.

2017-2018

**Turner: Addl Subsurface and IAW Sampling-17352 Derian Ave****Turner Royalty LLC, United States**

Ramboll Environ conducted additional subsurface investigation, including groundwater and soil vapor sampling, and indoor air sampling at the property located at 17352 Derian Avenue, Irvine, California. Information and data obtained during the described investigations will be incorporated into a report for submittal to a regulatory agency, likely the Santa Ana Regional Water Quality Control Board (RWQCB).

2017-2018

**CA & NV Phase II ESAs-Project Coordination**

Ramboll conducted Limited Phase II Environmental Site Assessments at 24 facilities located in California and Nevada. The work consisted of soil, soil vapor, groundwater, and indoor air quality sampling. The work also consisted of conducting geophysical surveys to identify underground storage tanks (USTs) and locations of former USTs. Due to the large amount (~100 anomalies) and complexity of the geophysical data, a ranking system was developed to evaluate and prioritize the geophysical anomalies. Follow up excavations were conducted at geophysical anomaly locations.

2018

**Groundwater Sampling**

This project consisted of conducting groundwater sampling from over 50 monitoring wells and preparing an annual report. In addition, a remedial pilot study proposal was prepared for work anticipated to start in 2019.

2013-2014

**Monitoring Well Installation****United States, United States**

Directed the installation of monitoring wells using hollow-stem auger and air-rotary drilling methods in alluvium and fractured bedrock. Field work included aquifer classification using field conditions to develop well construction details. Aquifers encountered at the site included unconfined, confined, fractures and slow recharge.

2013

**Excavation**

Supervised the field work for a large scale excavation and enhanced groundwater bioremediation project. Once the excavation reached total depth, bioremediation-enhancing products, LACTOIL and ACCELERITE were added to the floor of the excavation to enhance the bioremediation of chlorinated solvents. During backfilling, vent pipes were installed as a sub-slab mitigation system.

**PUBLICATIONS**

Groundwater

Authors: Mathew W. Becker, Brian Bauer, Adam Hutchinson

# STEPHANIE T ECKELMAN

Senior Consultant 1

**KEY COMPETENCIES**

Stephanie Eckelman has been an environmental consultant since 2000. Stephanie has conducted numerous ASTM Phase I Environmental Site Assessments of commercial, industrial and residential properties. She has assisted with multiple soil, groundwater, and soil vapor investigations for subsurface investigations and groundwater monitoring programs. Stephanie has conducted multiple waste audits for clients and has helped prepare waste audit documentation forms.

**PROJECTS**

**Phase I Environmental Site Assessment**

**Black Equities Warner Ctr Phase I, Woodland Hills, California, United States, Black Equities Group Ltd., 2018-2019**

Ramboll conducted a Phase I ESA for the northwestern portion of a property (former Northrop Grumman facility "Parcel A") located at 5500 Canoga Ave and 21240 Burbank Blvd, Woodland Hills, CA, referred to by the client, Black Equities Group, as the Warner Center Project.

**Site environmental auditor**

Conduct the site visit, interview on-site personnel, contact agencies, update staff on site status and prepare closing report.

**Manufacturing Facility Potential Relocation, Bakersfield, California, United States, 2008**

Water supply availability research and compilation

**Research and report preparation**

Researched and prepared report detailing various Urban Water Management Plans in the Central Basin for client to make informed decision on future land use purchase.

**Multiple Phase I ESA projects, California, United States, 2005-2020**

Prepared ASTM Phase I reports, including site visits, agency records reviews, and aerial photograph reviews on numerous properties including manufacturing, commercial retail properties, defense-related facilities;

**Consultant**

conducted multiple Phase I ESA site audits, client communication, subcontractor communication, report preparation and staff scheduling as needed.

**Phase I Environmental Site Assessments, California, United States, 2005-2020**

Ramboll conducted Phase I Environmental Site Assessments on multiple private, public and municipal properties.

**SPECIAL COMPETENCIES**

Due Diligence Phase I ESA  
 Waste Audits  
 gINT boring log template creation

**TOTAL YEARS OF EXPERIENCE**

17

**EDUCATION**

1998 BS, Environmental Studies

**COURSES/CERTIFICATIONS**

2020 OSHA 40-hour Hazardous Waste Operations and Emergency Response Standard - HAZWOPER

**Consultant**

Conduct site visits, prepare written reports, interact with clients and agencies, contract with subcontractors and update additional staff if the project required additional Ramboll services.

**Site Solutions****Investec: 2019 DryCleaner Comp Rev, Santa Barbara, Camarillo, Chula Vista, California, United States, Investec Real Estate, 2019**

Ramboll conducted reviews of three drycleaners located at the Central Plaza Shopping Center, 708 Arneill Road, Camarillo, California; the Mesa Shopping Center, 1998 Cliff Drive at Meigs Road, Santa Barbara, California; and the Plaza at Sunbow, 601 East Palomar Street Chula Vista, California.

**Site personnel**

Conduct site inspection, conduct personnel interviews, prepare report and share findings with client.

**Underground Storage Tank Removal Oversight, Alhambra, California, United States, 2018-2019**

Multiple abandoned UST's located and removed from the site.

**Field Supervisor**

Tasks included scheduling subcontractors, overseeing UST removals, collection of confirmation sampling, agency oversight communication, and report preparation.

**KS: Home Depot - LBP - California, California, United States, The Home Depot, 2017-2019**

Ramboll Environ assisted in connection with an investigation involving Home Depot's renovation projects in homes that may have contained lead based paint.

**Site auditor**

Conducted lead based paint sampling oversight, coordinate subcontractors and residents, prepare written documentation.

**Former Oil Field Pre- and Post- Stormwater Site Inspection, Santa Clarita, California, United States, 2007-2008**

Conducted Storm Water Pollution Prevention Plan monitoring including pre- and post-storm surface inspection on a form large oil field

**Inspector**

Conduct pre- and post-storm water site investigation for damaged BMP's on a large vacant former oil field.

**Lage Redevelopment Project, Santa Clarita, California, United States, 2006-2011**

Conducted soil sampling, surface water runoff sampling, groundwater sampling, soil vapor sampling and groundwater pump tests at a 1000-acre property;

**Site staff**

Collect soil samples, storm water samples, groundwater sampling and soil vapor samples.

**Pool Product Manufacturer, California, United States, 2002-2009**

Prepared and submitted Wastewater Treatment Surcharge Statements and tracked Wastewater Treatment Surcharge Quarterly Reports for a facility in South Los Angeles;

**Site staff**

Prepared wastewater treatment surcharge statements, updated staff and client on changes and maintained submission requirements.

**Entertainment Industry, Glendale, California, United States, 2001**

Managed well decommissioning, including permitting, for deep wells for various municipalities;

**Onsite personnel**

Managed well decommissioning, including permitting, for deep well located in Glendale.

Generate various boring log templates.

**Baker: SSF Add. Site Investigation, Not specified, California, United States, Baker Properties, Inc., 2017-2018**

Ramboll Environ conducted a soil, soil vapor, groundwater, and indoor air investigation at 160-180 Sylvester Road, South San Francisco, CA.

**Boring log**

Prepare MIP boring logs for the site.

**Boring Log template generation, California, United States, Multiple client projects., 2015-2020**

Prepared multiple subsurface boring log templates for multi-office use with gINT boring log software.

**Boring Log Generator**

Created and implemented new boring log templates and reports for numerous large scale projects.

**Large Shipping Company: 2019 California Waste Audit, California, United States, Amazon.com Services Inc., 2019-2020**

Ramboll performed an evaluation of the contents of municipal solid waste containers at three locations in California.

**Waste Auditor**

Conducted waste audit of compacted 40 cubic yard bin with agency oversight.

**Telecommunication: CA CJ Audits, Not specified, California, United States, 2015-2020**

Ramboll Environ conducted hazardous waste audits and trash sorts at multiple California locations of a telecommunications company in order to fulfill the requirements of a Consent Judgment against the company.

**Auditor**

Conducted multiple waste audits through multiple years at facilities throughout Southern and Central California.

**NE Corner Victoria St/Central, Carson RAP, Corner of South Central Avenue and Victoria Street, Carson, CA, United States, The Carson Project Owner, LLC, 2017-2018**

Ramboll prepared a Human Health Risk Assessment, conducted a statistical evaluation on distribution of chemicals, prepared a Remedial Action Plan and provided project management, attended meetings, and provided estimated costs for site remediation
